### **E2COWM - PATEL PORTER**

Austin, Texas, entered the aviation age on October 29, 1911, when Calbraith Perry Rodgers landed his Wright EX Flyer in a vacant field near the present-day intersection of Duval and 45th Streets. Some 3,000 excited people rushed out to see the pilot and his plane, much like the hundreds of thousands who mobbed Charles A. Lindbergh and The Spirit of St. Louis in Paris sixteen years later. Though no one that day in Austin could foresee all the changes that would result from manned flight, people here—as in cities and towns across the United States—realized that a new era was opening, and they greeted it with all-out enthusiasm. This popularly written history tells the story of aviation in Austin from 1911 to the opening of Austin-Bergstrom International Airport in 1999. Kenneth Ragsdale covers all the significant developments, beginning with military aviation activities during World War I and continuing through the barnstorming era of the 1920s, the inauguration of air-mail service in 1928 and airline service in 1929, and the dedication of the first municipal airport in 1930. He also looks at the University of Texas's role in training pilots during World War II, the growth of commercial and military aviation in the postwar period, and the struggle over airport expansion that occupied the last decades of the twentieth century. Throughout, he shows how aviation and the city grew together and supported each other, which makes the Austin aviation experience a case study of the impact of aviation on urban communities nationwide.

The UK Radiotelephony Manual (CAP 413) aims to provide pilots, Air Traffic Services personnel and aerodrome drivers with a compendium of clear, concise, standard phraseology and associated gui-

dance for radiotelephony communication in United Kingdom airspace

A Flight Information Manual for the Cessna 152, for use when learning to fly on the C152 or during type rating training, and a great reference manual for pilots who fly the aircraft. Compiled from engineering manuals, manufacturers handbooks, and the author's personal in depth flight experience. Provides straight forward, useful explanations of the aircraft, systems and flight operations including performance planning, with photographs, diagrams and schematics.

The dinner with Emma was a gift after the tense period in Budapest. While eating, I looked at her face as she was talking, animated, relaxed, laughing, with short periods of seriousness. I wished I could take pictures in those moments, moments that I had missed, moments that I usually miss. I often thought about my pictures, what sort of photographer was I? A portrait photographer? A journalist? In that moment, thinking of taking pictures of her while she was eating, of the way she closed her eyes with each bite, and laughed under the calming light in the room, I considered myself a photographer of moods. Mark works in a current affairs magazine as a photographer. He spends his time bickering and philosophising with his friends. Young to middle aged, Mark and his friends pass their moments avoiding commitments, shunning what goes on around them. There are times to make decisions often made through no action. Responsibilities dissolve in comfort, and emotions seem to be foreign phenomena in their life under illusion of personal liberty. Can this all change?

This easy-to-read aviation book is ideal for student pilots with no flight background who wish to gently immerse themselves in flight training. It's ideal for private and sport pilots to brush up on the aero basics before a biennial flight review (BFR). Flight and ground school instructors will appreciate the Private Pilot Beginner's Manual (for Sport Pilots too) as the ultimate guide for introducing or reviewing aeronautical basics without scaring off future, or returning, pilots with overly technical dissertations. You'll laugh, you'll fly, you'll refer back to it throughout your flying life.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.
