Making use of his scholar's understanding, yet writing in an approachable and anecdotal style, Tom Wright manages to unravel the great complexity of the extraordinary Gospel of John. He describes it as "one of the great books in the literature of the world; and part of its greatness is the way it reveals its secrets not just to a high-flown leaning but to those who come to it with humility and hope." Wright's stimulating comments are combined with his own fresh and inviting translation of the Bible text. Tom Wright has undertaken a tremendous task: to provide guides to all the books of the New Testament, and to include in them his own translation of the entire text. Each short passage is followed by a highly readable discussion with background information, useful explanations and suggestions, and thoughts as to how the text can be relevant to our lives today. A glossary is included at the back of the book. The series is suitable for group study, personal study, or daily devotions.

This book takes a fresh look at the brutal story of the war between the sons of Israel and the sons of Benjamin in Judges 19-21. Relying on archaeological and survey data largely overlooked by biblical scholars, Krisel engages critically with the predominant scholarly view that Judges 19-21 uses "irony" to cast the explicit heroes in the narrative, the sons of Israel, as the implicit villains.

While many Civil War reference books exist, there is no single compendium that contains important details about the combatant states (and territories) that Civil War researchers can readily access for their work. People looking for information about the organization, activities, economies, demographics, and prominent personalities of Civil War states and state governments must assemble data from a variety of sources, and many key sources remain unavailable online. This volume, the first of six, provides a crucial reference book for Civil War scholars and historians, professional or amateur, seeking information about individual states or groups of states. Its principal sources include the Official Records, state adjutant-general reports, legislative journals, state and feder-

al legislation, federal and state executive speeches and proclamations, and the general and special orders issued by the military authorities of both governments. Designed and organized for easy use, this book can be read in two ways: by individual state, with each chapter offering a stand-alone skeletal history of an individual state's war years, or across states, comparing reactions to the same event or solutions to the same problems.

The Mental Capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

This publication sets out the statutory requirements for signing, lighting, and guard-

ing at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works;

and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).
