This highly practical textbook incorporates a wide range of engaging activities and encourages students to think critically about important social and educational issues. This volume is the second of a series deepening the research understanding and academic study of Language Arts, as an English-language teaching paradigm. Previously used extensively in native-speaking countries, Language Arts has been taken up in the past decade in many parts of Asia. Language Arts uses intrinsically motivating materials such as literature, drama and popular culture to help students develop mastery of written and spoken language and text-types. In recent years, Language Arts has embraced media and multiliteracies, as well as critical and creative thinking, intercultural sensitivity, civics and ethics. This volume offers a breadth of topics, which embody methodologically sophisticated and contemporary language arts research. These include multimodal analysis, virtual environments, the use of comics, anime and film in second language teaching, and learners' ex-

periences of drama and literary tourism. The use of literature and the arts in humanist education has a long history within Europe. It was traditionally appreciated for its ability to instil ethics and finer sensibilities and teach leadership. But the traditional program was marred by its function in inculcating and preserving elitist, high-culture voices, texts and values. The post-colonial incarnation of Language Arts has been informed by critical and linguistic theory, helping it to embrace a popular scope, and include a wide array of authentic social and media texts. The movement of English-language teaching beyond native-speaker shores has given rise to a vibrant variety of World Englishes, whose literary and media works are now represented within Language Arts. The explosion of media over the past few decades has given rise to an increasing array of media to use in language teaching. These trends invite scholarly analysis, and this is clearly reflected in the chapters in this volume. Linguistics has long had a connection to, and a natural role to play in, analysing the creative verbal and visual arts. As a paradigm, Language Arts now takes an inclusive view of the continuum of spoken, written and performed languages and texts. Cutting edge Language Arts research is now also supported through the new journal Language Arts and Linguistics (Taylor and Francis).

Now a major motion picture starring Brie Larson, Naomi Watts and Woody Harrelson. This is a startling memoir of a successful journalist's journey from the deserted and dusty mining towns of the American Southwest, to an antique filled apartment on Park Avenue. Jeanette Walls narrates her nomadic and adventurous childhood with her dreaming, 'brilliant' but alcoholic parents. At the age of seventeen she escapes on a Greyhound bus to New York with her older sister; her younger siblings follow later. After pursuing the education and civilisation her parents sought to escape, Jeanette eventually succeeds in her quest for the 'mundane, middle class existence' she had always craved. In her apartment, overlooked by 'a portrait of someone else's ancestor' she recounts poignant remembered images of star watching with her father, juxtaposed with recollections of irregular meals, accidents and police-car chases and reveals her complex feelings of shame, guilt, pity and pride toward her parents.

There are certain questions that all students considering social work ask. Who are social workers? What is it that social workers do? How is the social work profession changing? What does it take to become a social worker? Ira Colby and Sophia Dziegielewski bring their decades of experience in social work practice and education to answer these questions. This engaging text gives readers a practical guide to the many ways in which social workers effect change in their communities and the world. The authors offer an overview and history of the profession; introduce readers to the practice of social work at the micro, mezzo, and macro level; and finally look closely at the many settings and

populations that social workers work with. While realistically portraying the pressures and obstacles that social workers face, Colby and Dziegielewski communicate their own passion for social work.

Classroom tests are an everyday feature of second and foreign language classrooms worldwide. Teachers spend a lot of time and energy making and using tests, and learners spend a lot of time

and energy taking them. Nonetheless, such assessments are under-studied, as they are considered routine. This volume illuminates this little-researched area. Featuring fifteen classroom language tests made and used by Chinese, English, French, German, Italian, Japanese, Russian, and Spanish teachers, the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers' processes of making and using their tests. Rather than view teachers' tests as poor shadows of what professional test writers do, this work identifies the reasoning behind teachers' tests. In addition, focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary. This book is an accessible, applied resource for second and foreign language teachers, language program administrators working with teachers, students in teacher preparation and enrichment programs, and scholars in language teaching, learning, and testing.
