Chevron WELLSAFE initiative aims to drive enhanced discipline around well control. By Linda Hsieh, managing editor. Leo Tolstoy once wrote, “Every-one thinks of changing the world, but no one thinks of changing himself.” When it comes to well control, however, Chevron is not waiting around. With a global well control initiative that will be rolled out later this year, the company is pushing change from within.

Well control, like safety, is too important to be leveraged as a competitive advantage. That’s why Chevron is planning to share with the wider industry a tool - called DrillPad - that the operator launched in 2015 to assist with the planning and tracking of well control drills. The software was developed as part of Chevron’s WellSafe assurance program, which certifies that every one of the company’s business units, wells and contracted rigs adheres to a uniform set of standards.

[Chevron Well Control Simulator | LearnToDrill](#)

Also, all the course and/or course combinations comply with the curriculum requirements of The Well Control School Certified and/or The IADC Well-CAP® certification program. During this training WCS will be utilizing witness verification to preserve the integrity of the IADC WellCAP® certification program.
