[PV installation forecast in China lowered in 2019 but ...](#)

India imported solar and photovoltaic cells worth about USD 826 million from China during April-September period of 2016-17. India imported USD 2,344.56 million worth of cells last fiscal, out of which USD 1,960.26 million was from China constituting 83.61 per cent of the total and USD 134 million from Malaysia.

IHS Markit still forecasts 129 GW of global installations this year and 24% solar market growth Y-o-Y. Our current assumption is that this 5 GW decrease in demand in China will be balanced out by faster than anticipated growth in some other international markets. These markets could include the Netherlands, Spain, Germany, Italy, Turkey, or Ukraine.

China Solar PV Industry Analysis 2017-2030, has been prepared based on an in-depth market research from PV market experts. The report covers the competitive landscape and current position of major players in the China solar PV market space. The report also includes Porter's five force model, SWOT analysis, company profiling, business strategies of market players and their business models. "China Solar PV Market Report" also recognizes value chain analysis to understand the cost ...
