Steel Structures - Civil Engineers PK

Steel Structures. Steel structures is a very important subject for
 undergraduate civil engineers. Steel is an alloy of carbon and iron.
 It used in construction and other applications because of its Hard-
 ness and tensile strength. Due to the tensile strength of steel, it is
 added in concrete otherwise concrete is very much powerful in
 compression.

The steel tables for the design of steel structures are used by civil
 engineering students and civil engineers. Steel, which is a very im-
 portant basic raw material for industrialization, had been receiv-
 ing considerable attention from the Planning Commission even
 from the very early stages of the country’s First Five Year Plan pe-
 riod.
