Welcome to CodeIgniter¶. CodeIgniter is an Application Development Framework - a toolkit - for people who build web sites using PHP. Its goal is to enable you to develop projects much faster than you could if you were writing code from scratch, by providing a rich set of libraries for commonly needed tasks, as well as a simple interface and logical structure to access these libraries.

#### Welcome to CodeIgniter — CodeIgniter 3.1.11 documentation

Database Reference¶ CodeIgniter comes with a full-featured and very fast abstracted database class that supports both traditional structures and Query Builder patterns. The database functions offer clear, simple syntax.

#### CodeIgniter User Guide — CodeIgniter 3.0.0 documentation

Added 2 CodeIgniter "cheatsheets" (thanks to DesignFellow.com for this contribution). Bug fixes for 1.7.2. Fixed assorted user guide typos or examples (#6743, #7214, #7516, #7287, #7852, #8224, #8324, #8349). Fixed a bug in the Form Validation library where multiple callbacks weren't working (#6110) doctype helper default value was missing a "1".

#### Change Log : CodeIgniter User Guide

Manual Model Creation ... CodeIgniter does provide a model class that provides a few nice features, including: ... like a user, a blog post, job, etc. This class is responsible for maintaining the business logic surrounding the object itself, like formatting elements in a certain way, etc. They shouldn't have any idea about how they are saved ...

#### Using CodeIgniter's Model — CodeIgniter4 4.0.0-rc.3 ...

FTP Class¶. CodeIgniter's FTP Class permits files to be transferred to a remote server. Remote files can also be moved, renamed, and deleted. The FTP class also includes a "mirroring" function that

permits an entire local directory to be recreated remotely via FTP.

#### FTP Class — CodeIgniter 3.1.11 documentation

The primary documentation for CodeIgniter is its User Guide. The User Guide contains an introduction, tutorial, a number of "how to" guides, and then reference documentation for the components that make up the framework.

#### CodeIgniter Documentation

I have fixed the web-accessible CodeIgniter4 User Guide. It now pulls in CSS properly, so it is readable, and it pulls in Javascript, so it is searchable too. This is for the "develop" branch, which means it is an "in progress" user guide, and its contents will change.
