The earliest reports of a coronavirus infection in animals occurred in the late 1920s, when an acute respiratory infection of domesticated chickens emerged in North America. Arthur Schalk and M.C. Hawn in 1931 made the first detailed report which described a new respiratory infection of chickens in North Dakota. The infection of new-born chicks was characterized by gasping and listlessness with ...

However, some animals see colors we cannot. Spiders and many insects can see a type of light called ultraviolet that most humans cannot see. Other animals, like snakes, are able to see infrared light. You can use the chart below to explore what

colors certain animals see and how they compare to human color vision.

Colors Animals See | Ask A Biologist

Human communicators often come with "baggage". Animals simply come! Their communications are often more pure and less complicated. They bring with them the same degree of love (albeit a different form of love) that humans do. It's really quite amazing to experience. Animals do not communicate in exactly the same way human spirits do.

FST: Spiritual Teachings: When Your Pet Dies

All animals produce young which must be cared for by the parents. We see a snake and an ostrich hatching from an egg. Not all young animals look like their parents.
