Complexity theory and organizations, also called complexity strategy or complex adaptive organizations, is the use of the study of complexity systems in the field of strategic management and organizational studies. It draws from research in the natural sciences that examines uncertainty and non-linearity. Complexity theory emphasizes interactions and the accompanying feedback loops that constantly change systems. While it proposes that systems are unpredictable, they are also constrained by orde

The development of system boundaries in time and space is prerequisite for understanding dynamic complexity. In most circumstances, the main management tool is correct knowledge and deep understanding of the relationships between components and the whole system and not addressing the identification of components and their physical location.
