U.S. Marine Corps Concepts & Programs

U.S. Marine Corps Concepts and Programs is an annual strategic communications publication used by the Marine Corps to inform Congress, the Office of Secretary of Defense, Chairman of the Joint Chiefs of Staff, and general public about Marine Corps warfighting concepts and combat development lines of effort.

The provision of marine parks and sanctuary areas are obvious first steps in providing a measure of protection, at least for the less widely ranging species. Related to the current concepts of ecosystem management are expressions such as ecosystem health and ecosystem integrity which are given a wide range of different meanings, none of which are readily translated into operational language for resource management.

Concepts and issues in marine ecosystem management

Marine and coastal environment issues are dynamic and diverse. This section of the site is a good starting point for research into many of the pressing concerns of the nations and territories of the Wider Caribbean Region. They contain definitions, descriptions, discussions, links to relevant on-line documents and web sites.

Human impacts on marine environments — Science Learning Hub

Current interest in marine ecosystem management stems from concerns about overexploitation of world fisheries and the perceived need for broader perspectives in fisheries management. A central scientific question is whether the effects of harvesting (top down) or changes in the physical environment (bottom up) are responsible for major changes in abundance.
