C.W. Fetter. 4.43 · Rating details · 14 ratings · 0 reviews. Suitable for a graduate-level course in Mass Transport and Contaminant Hydrogeology, this work provides a treatment of both the theoretical background of the science as well as a practical application of the technologies for investigation and remediation of contaminated soil and groundwater.

Written for courses in mass transport and contaminant hydrogeology, this authoritative text is aimed at students who have completed basic courses in hydrogeology, chemistry, calculus, and physics. It balances theory with the practical application of technology for the study and effective remediation of contaminants in soils and groundwater.
