944 Coolant System Radiator Hose Diagram

Radiator input hose, is a radiator input hose that channels high temperature coolant from the engine. Radiator Outlet hose, is a radiator output hose that carries low-temperature coolant to be supplied back to the water jacket on the engine. By pass hose, this hose becomes a divider hose to several components at once.

interconnecting hoses to transfer the coolant from engine to radiator (and also to the car's heater system where hot coolant is used to warm up the vehicle's interior) A cooling system works by sending a liquid coolant through passages in the engine block and heads. As the coolant flows through these passages, it picks up heat from the engine.
