For example, conscientiousness has received a great amount

of attention as a protective factor from stress because it has been associated with task-oriented coping.

The Relationship Between Personality Traits and Coping ...

Specifically, coping is conceptualized as an individual's cognitive and behavioural efforts to manage the demands, both internal and external, of a stressful transaction (Folkman et al., 1986). Coping strategies are used to mitigate issues which are causing distress and impacting emotions (Folkman et al., 1986).

Coping strategies and personality traits among individuals ...

A phenomenological analysis showed that there are three main stages of overcoming the negative feelings experienced by people whose parents suffered from alcohol addiction: awareness of feelings, studying of the characteristics of the feelings and their impact on their families, and the search for the coping strategies of the patient's family system.

Coping Strategies and Personality Profile

Characteristics ...

Consistent with the suggestion by Ref. and Cohan, Jang and Stein ; we grouped these coping strategies into three categories: task-oriented coping (i.e., active coping, and planning), emotion-oriented coping (i.e., seeking social support for instrumental reasons, seeking social support for emotional reasons, and positive reinterpretation and growth), and avoidance-oriented coping (i.e., behavioural disengagement, mental disengagement, and alcohol drug disengagement). Items were measured on a ...
