Corporate Finance Definition - investopedia.com
Corporate finance is a general term that refers to how companies acquire funding, how they organize and use their debt and equity, and how they manage their investments. People who work in corporate finance are trying to maximize the value of their business through three main activities: capital investments, capital financing, and capital return methods.

Investment Banking - Overview, Guide, What You Need to Know By Michael Taillard. Corporate finance is the study of how groups of people work together as a single organization to provide something of value to society. If a corporation is using up more value than it's producing, it will lose money and fail. So it's the job of those in corporate finance to manage the organization so that resources are efficiently utilized; the most valuable projects are pursued; and the corporation can remain competitive and everyone gets to keep his job.

Everything You Need to Know About Corporate Finance. 23 May 2019. The world of corporate finance can be tricky to navigate for business owners, with even the most basic of business deals requiring a mountain of paperwork, research and legal assistance from both parties.

A corporate finance professional is primarily tasked with managing an organisations money and you could find yourself working on a wide range of matters, including capital raising (through either securing a loan from an investment bank, restructuring the business or winning financial backing through another platform e.g. crowd-funding), mergers, acquisitions, changes in ownership and other activities to improve business. The corporate finance domain is like a liaison between the firm and the capital markets. The purpose of the financial manager and other professionals in the corporate finance domain is twofold. Firstly, they need to ensure that the firm has adequate finances and that they are using the right sources of funds that have the minimum costs.

FINANCIAL ADVICE: Why do you need a Corporate Finance ...
The financial resource requirement for a non-MiFID corporate finance firm is that it must maintain tangible net worth and net assets greater than £10,000. With the activities and requirement outlined above, firms will generally refer to IPRU (INV) Chapter 3 and not come under MiFID.
Underwriting is the process of raising capital through selling stocks or bonds to investors (e.g., an initial public offering IPO) on behalf of corporations or other entities. Businesses need money to operate and grow their businesses, and the bankers help them get that money by marketing the company to investors.
