Corsair's brand new VX450W power supply comes with a maximum load of 450W. While this may not sound much it is absolutely sufficient to power most of today's systems. The PSU has a very high efficiency of over 83% which allows the fan to run slower because there is not so much excess heat to get rid of.

**CORSAIR GAMING RGB KEYBOARD SOFTWARE USER MANUAL** The device selector appears in the lower right-hand corner of the Corsair Utility Engine and provides you important information about your Corsair Gaming keyboard When the Corsair Gaming Keyboard is connected to your computer, the device selector will show an

Ask the question you have about the Corsair Gaming K95 RGB here simply to other product owners. Provide a clear and comprehensive description of the problem and your question. The better your problem and question is described, the easier it is for other Corsair Gaming K95 RGB owners to provide you with a good answer.

The same manual that Corsair uses for the VX450W is also used for the VX550W. So even though we're having a look at the 450W version today, we can also have a sneak peak at the 550W unit. I'm going to cheat a little and flip to the part of the manual that shows the DC output of the 450W and 550W models.
