On its first appearance in 1891, Brahms' Clarinet Quintet was immediately recognised as a remarkable achievement, and a century later it still has the power to claim the hearts and minds of players and audiences alike. Widely regarded as Brahms' supreme achievement in the field of chamber music, the Clarinet Quintet is here placed in the context of the history of the clarinet and its repertory, and of Brahms' own compositions before 1891. The influence of the Meiningen clarinet virtuoso Richard Mühlfeld unleashed a new vein of creativity in Brahms, and this forms a basis for discussion, together with questions of performance practice (in relation to both clarinet and string quartet) and the legacy of Brahms' clarinet music. These chapters are complemented by a comprehensive analysis of the music.

The name "mandolin" was used to refer to two quite different instruments: the gut-stringed mandolino, played with the fingers, and the later metal-stringed Neapolitan mandoline, which was played with a plectrum. This is the first book devoted exclusively to these two early instruments about which information in reference books is scant and often erroneous. The authors uncover their rich and varied musical history, examining contemporary playing techniques and revealing the full extent of the instruments' individual repertoires, which include works by Vivaldi, Sammartini, Stamitz, and Beethoven. The book's ultimate aim is to help today's players to produce artistically satisfying performances through an understanding of the nature and historical playing style of these unjustly neglected instruments.
