Maximizing reader insights into the principles of designing furniture as wooden structures, this book discusses issues related to the history of furniture structures, their classification and characteristics, ergonomic approaches to anthropometric requirements and safety of use. It presents key methods and highlights common errors in designing the characteristics of the materials, components, joints and structures, as well as looking at the challenges regarding developing associated design documentation. Including analysis of how designers may go about calculating the stiffness and endurance of parts, joints and whole structures, the book analyzes questions re-

garding the loss of furniture stability and the resulting threats to health of the user, putting forward a concept of furniture design as an engineering processes. Creating an attractive, functional, ergonomic and safe piece of furniture is not only the fruit of the work of individual architects and artists, but requires an effort of many people working in interdisciplinary teams, this book is designed to add important knowledge to the literature for engineer approaches in furniture design. The books in this series are devoted to the design and construction of fine furniture for every room in the house. WE have selected for presentation here what we consider the best of the houses designed in The Craftsman Workshops and published in THE CRAFTSMAN during the past five years. Brought together in this way into a closely related group, these designs serve to show the development of the Craftsman idea of home building, decoration and furnishing, and to make plain the fundamental principles which underlie the planning of every Craftsman house. These principles are simplicity, durability, fitness for the life that is to be lived in the house and harmony with its natural surroundings. Given these things, the beauty and comfort

of the home environment develops as naturally as a flowering plant from the root.

These workshop drawings feature 27 pieces of household furniture designed by Gustav Stickley and his contemporaries of the Craftsman movement. Every type of furniture is represented here: Morris chairs, chests of drawers, wall shelves, bookcases, sideboards, dining tables, occasional tables, beds, side chairs, and rockers. Each project includes a perspective view along with elevations, sections and details, and complete measurements.

Offers step-by-step instructions and helpful tips for eighteen furniture projects for the home.
