The use of intersectionality theory in the social sciences has proliferated in the past several years, putting forward the argument that the interconnected identities of individuals, and the way these identities are perceived and responded to by others, must be a necessary part of any analysis. Fundamentally, intersectionality claims that not only are people's lived experiences affected by their racial identity and by their gender identity, but that these identities, and others, continually operate together and affect each other. With "official" statistical data that indicate people of Color have higher offending and victimization rates than White people, and with the overrepresentation of men and people of Color in the criminal legal system, new theories are required that address these phenomena and that are devoid of stereotypical or debasing underpinnings. Intersectionality and Criminology provides a comprehensive review of the need for, and use of, intersectionality in the study of crime, criminality, and the criminal legal system. This is essential reading for academics and students researching and studying in the fields of crime, criminal justice, theoretical criminology, and gender, race, and socioeconomic class.

Bringing together a collection of essays by writers with diverse knowledge of the US criminal justice system, from those with personal experience in prison and on patrol to scholarly researchers, *What Is a Criminal?* explores the category of "criminal" through the human stories of those who bear and administer that label. This book performs a rare feat in bringing together the perspectives of justice-impacted people, those who work in law enforcement and social services, and scholarly researchers. Each chapter is a compelling narrative sharing the experience and perspective of a unique person with knowledge of the justice system. The first section, "Incarceration, Reentry, and Rebuilding," gives a glimpse into the "black box" of prison, with firsthand accounts of daily life on the inside and the struggle to begin a new life after prison. Section 2, "Journeys in Law Enforcement," presents perspectives from police officers, school resource officers, and corrections officers who are working to better their communities. The third section, "Ripple Effects," addresses some of the broader impacts of the justice system, showing what it is like to be the child of an incarcerated parent, to be profiled, to be an undocumented immigrant, and to make art about the justice system. The final section, "Scholarly Perspectives," is comprised of accessible articles by academics who study law and crime. Each chapter stands alone as an individual story, but taken together they provide a uniquely nuanced view of the US justice system. This book will be of interest to anyone who wants to know more about criminality, the US justice system, and the people involved in it. It is designed for a general audience, with accessible, compelling stories that will appeal to a variety of readers. A corporation is an artificial legal person, existing only in the contemplation of law, having perpetual succession and common seal. Can a corporation commit crime, for its inability to form mens rea? If yes, then can it be accused of crimes as grave as homicide? Even post the Bhopal Gas Tragedy and the Uphaar Cinema Tragedy, absence of legislation such as the Corporate Manslaughter and Corporate Homicide Act, 2007 (UK) is no less a pity. Absolute liability theory (coupled with deep-pocket theory), though is an improvisation over the strict liability theory but has failed to ensure corporate criminal deterrence. This book is an attempt to ponder over issues relating to corporate criminal behaviour, in particular 'corporate homicide' and 'corporate manslaughter'.

Manufacturing Guilt, 2nd edition, updates the cases presented in the first edition and includes two new chapters: one concerning the case of James Driskell and another regarding Dr. Charles Smith, whose role in forensic pathology evidence led to several wrongful convictions. In this new edition, the authors demonstrate that the same factors at play in the criminalization of the powerless and marginalized are found in cases of wrongful conviction. Contrary to popular belief, wrongful convictions are not due simply to "unintended errors," but rather are too often the result of the deliberate actions of those working in the criminal justice system. Using Canadian cases of miscarriages of justice, the authors argue that understanding wrongful convictions and how to prevent them is incomplete outside the broader societal context in which they occur, particularly regarding racial and social inequality.

"This book reviews the very latest empirical evidence with regard to the risk factors that produce antisocial and criminal behavior. The authors meaningfully integrate risk factors identified by more than a dozen academic disciplines that increase the odds of antisocial behavior and criminality. The result is a new interdisciplinary theory that helps break down traditional barriers and overcomes the "disciplinary myopia" that plagues criminological theory. Unlike the typical criminological theory text, this book actually advances the state of criminological theory as well as the field of criminology"--

Boutwell aim to facilitate an open and honest debate between the more traditional criminologists who focus primarily on environmental factors and contemporary biosocial criminologists who examine the interplay between biology/genetics and environmental factors.
