The 8.3L QSC Diesel engine was developed by Cummings, an American engine manufacturer with over 80 years in business. For this particular engine they teamed up with Mercury Marine, an industry leader in marine vehicle performance that began in 1939. The result was an engine designed for both recreational and commercial boats.

The basic Cummins run harness provides all the required circuits for the engine to operate properly. Due to the flexibility of the Cum mins ECM, many more functions are available depending upon the final engine application. Following is a list of additional circuits and/or kits that CCI can provide.
