OERHP6 - ANASTASIA BURNETT

This 2005 examination of twelve case studies about mistake, fraud and duties to inform reveals significant differences about how contract law works in thirteen European legal systems and, despite the fact that the solutions proposed are often similar, what divergent values underlie the legal rules. Whereas some jurisdictions recognise increasing duties to inform in numerous contracts so that the destiny of mistake and fraud (classical defects of consent) may appear to be uncertain, other jurisdictions continue to refuse such duties as a general rule or fail to recognise the need to protect one of the parties where there is an imbalance in bargaining power or information. Avoiding preconceptions as to where and why these differences exist, this book first examines the historical origins and development of defects of consent, then considers the issues from a comparative and critical standpoint.

The dislocations of the worldwide economic crisis, the necessity of a system of global justice to address crimes against humanity, and the notorious 'democratic deficit' of international institutions highlight the need for an innovative and truly global legal system, one that permits humanity to re-order itself according to acknowledged global needs and evolving consciousness. A new global law will constitute, by itself, a genuine legal order and will not be limited to a handful of moral principles that attempt to guide the conduct of the world's peoples. If the law of nations served the hegemonic interests of Ancient Rome, and international law

served those of the European nation-state, then a new global law will contribute to the common good of all humanity and, ideally, to the development of durable world peace. This volume offers a historical-juridical foundation for the development of this new global law.

A full-scale study of the political thought of the Italian jurist, Baldus de Ubaldis (1327-1400).

The Historical Foundations of Grotius' Analysis of Delict explores the origins of the generalised model of liability for wrongdoing presented in the writings of Grotius, analysing the extent to which earlier civilian and theological doctrines shaped his views.

Ars Docendi et Scribendi: Essays in honour of Johan Scott Edited by the Faculty of Law, University of Pretoria ISBN: 978-1-920538-76-7 Pages: 243 Print version: Available Electronic version: Free PDF available About the publication "Festschrift" - a collection of articles by the colleagues, former students, etc. of a noted scholar, published in his or her honour. During his travels abroad Johan Scott built up a wide network of international scholars who over time became a valued circle of friends, many of whom spent enriching moments in his company and who contributed to this Festschrift. Contributors were requested to write in their home language, and furthermore to submit their contributions for publication in other journals worldwide, specifically accrediting this Festschrift in order to expand access worldwide to the wonderful contributions written in honour of our colleague. Great scholars like Johan never retire. They might go fishing more than they could in the past, but his calling of being a true teacher will never fade. Scholars like Johan understand that the present and the future are inevitably linked to the past, and although education depends on talent and performance, it should always serve to build character and a vision for future generations. Explores a fundamental building block of Roman life

The delict of iniuria is among the most so-

phisticated products of the Roman legal tradition. The original focus of the delict was assault, although *iniuria*—literally a wrong or unlawful act—indicated a very wide potential scope. Yet it quickly grew to include sexual harassment and defamation, and by the first century CE it had been re-oriented around the concept of *contumelia* so as to incorporate a range of new wrongs, including insult and invasion of privacy. In truth, it now comprised all attacks on personality. It is the Roman delict of *iniuria* which forms the foundation of both the South African and—more controversially—Scots laws of injuries to personality. On the other hand, *iniuria* is a concept formally alien to English law. But as its title suggests, this book of essays is representative of a species of legal scholarship best described as 'oxymoronic comparative law', employing a concept peculiar to one legal tradition in order to interrogate another where, apparently, it does not belong. Addressing a series of doctrinal puzzles within the law of assault, defamation and breach of privacy, it considers in what respects the Roman delict of *iniuria* overlaps with its modern counterparts in England, Scotland and South Africa; the differences and similarities between the analytical frameworks employed in the ancient and modern law; and the degree to which the Roman proto-delict points the way to future developments in each of these three legal systems.

The 'school controversies' between the Sabinians and the Proculians continue to be the focus of debate in Roman law. The present volume attempts to determine what gave rise to these controversies by associating them with legal practice and the use of topic-related argumentation.

Law and Love in Ovid challenges the view that legal language in poetry is a sign of frivolity and argues that it signals a radical return to the roots of law's creation.

The recent financial crisis has questioned whether existing contracts may be adapted, terminated or renegotiated as a result of unexpected circumstances. The question is not a new one. In medieval times the notion of *clausula rebus sic stantibus* was developed to cope with such situations, and Germany introduced the theory of *Wegfall der Geschäftsgrundlage*. In England, the Coronation cases provided one possible answer. This comparative study explores the possibility of classifying jurisdictions as 'open' or 'closed' in this regard.

This is a study of the legal rules affecting the practice of female prostitution at Rome approximately from 200 B.C. to A.D. 250. It examines the formation and precise content of the legal norms developed

for prostitution and those engaged in this profession, with close attention to their social context. McGinn's unique study explores the "fit" between the law-system and the socio-economic reality while shedding light on important questions concerning marginal groups, marriage, sexual behavior, the family, slavery, and citizen status, particularly that of women.

Volume one, *Stoicism in classical Latin literature* (09327-3), approaches its subject from the standpoint of intellectual history, examining how Stoicism was used by Roman thinkers, for what purposes, and how they correlated it with their other sources. Volume two, *Stoicism in Christian Latin thought through the sixth century*, (09328-1), focuses on how a particular Latin Christian author used Stoic ideas, to what ends, and how they were associated in his mind with the other doctrines he had to work with. Comprising an array of distinguished contributors, this pioneering volume of original contributions explores theoretical and empirical issues in comparative law. The innovative, interpretive approach found here combines explorative scholarship and research with thoughtful, qualitative critiques of the field. The book promotes a deeper appreciation of classical theories and offers new ways to re-orient the study of legal transplants and transnational codes. *Methods of Comparative Law* brings to bear new thinking on topics including: the mutual relationship between space and law; the plot that structures legal narratives, identities and judicial interpretations; a strategic approach to legal decision making; and the inner potentialities of the 'comparative law and economics' approach to the field. Together, the contributors reassess the scientific understanding of comparative methodologies in the field of law in order to provide both critical insights into the traditional literature and an original overview of the most recent and purposive trends. A welcome addition to the lively field of comparative law, *Methods of Comparative Law* will appeal to students and scholars of law, comparative law and economics. Judges and practitioners will also find much of interest here.

The North-West Semitic epigraphic contributes considerably to our understanding of the Old Testament and of the Ugaritic texts and to our knowledge of the North-West Semitic languages as such. This dictionary is concerned with the North-West Semitic material found in inscriptions, papyri and ostraca in Phoenician, Punic, Hebrew, various forms of Aramaic, Ammonite, Edomite, the language of Deir Alla et cetera. The material covers the period

from ca. 1000 B.C. to ca. 300 A.D. Besides translations the entries include discussions and full references to scholarly literature. The book is a translated, updated and considerably augmented edition of Jean & Hoftijzer, "Dictionnaire des inscriptions semitiques de l'ouest." The additions concern newly found texts as well as references to new scholarly literature. The book is an indispensable tool for research in North-West Semitic epigraphy, on the Old Testament and on Ugaritic texts, and for Semitic linguistics.

This monumental study of medieval law and sexual conduct explores the origin and development of the Christian church's sex law and the systems of belief upon which that law rested. Focusing on the Church's own legal system of canon law, James A. Brundage offers a comprehensive history of legal doctrines—covering the millennium from A.D. 500 to 1500—concerning a wide variety of sexual behavior, including marital sex, adultery, homosexuality, concubinage, prostitution, masturbation, and incest. His survey makes strikingly clear how the system of sexual control in a world we have half-forgotten has shaped the world in which we live today. The regulation of marriage and divorce as we know it today, together with the outlawing of bigamy and polygamy and the imposition of criminal sanctions on such activities as sodomy, fellatio, cunnilingus, and bestiality, are all based in large measure upon ideas and beliefs about sexual morality that became law in Christian Europe in the Middle Ages. "Brundage's book is consistently learned, enormously useful, and frequently entertaining. It is the best we have on the relationships between theological norms, legal principles, and sexual practice."—Peter Iver Kaufman, *Church History*

This book reflects the wide range of current scholarship on Roman law, covering private, criminal and public law. This is the first systematic treatment in English by an historian of the nature, aims and efficacy of public law in late imperial Roman society from the third to the fifth century AD. Adopting an interdisciplinary approach, and using the writings of lawyers and legal anthropologists, as well as those of historians, the book offers new interpretations of central questions: What was the law of late antiquity? How efficacious was late Roman law? What were contemporary attitudes to pain, and the function of punishment? Was the judicial system corrupt? How were disputes settled? Law is analysed as an evolving discipline, within a framework of principles by which even the emperor was bound. While law, through its language, was an expression of

imperial power, it was also a means of communication between emperor and subject, and was used by citizens, poor as well as rich, to serve their own ends.

This topical and important book identifies the short to medium-term economic, financial and social consequences of Brexit. Containing perspectives from leading thinkers across legal, economic and financial fields, it considers both the general effect of UK withdrawal on the European integration process, and the specific impact on the free movement of capital, goods and people. Addressing the main areas within both the UK and the EU that can and will be affected by Brexit, including the financial sector, immigration, social rights and social security, *After Brexit: Consequences for the European Union* will make fascinating reading for all those currently engaged in the study and practice of Law, Economics, Finance, Political Science, Philosophy, History and International Affairs.

In this collection of essays, contributors act on John Crook's injunction to 'think like lawyers' about Roman law and Rome—and also ancient Greece, Persia, and the modern world. A literary strand runs through the book alongside its legal and historical strands.

Exploring the history of internal security under the first Roman dynasty, this book answers the enduring question: If there were nine thousand men guarding the emperor, why did Rome have the highest rate of assassination of any world empire? Sheldon concludes that the repeated problem of "killing Caesar" reflected the empire's larger dynamics and turmoil.

This English translation makes available to anglophone readers a modern classic of German tort theory. It argues that modern German tort law is faced with doctrinal tensions based on problematic theoretical assumptions which stem from historical conceptions of tortious liability, inappropriate to modern times. From a theoretical perspective, it argues against the prevalent doctrinal view in Germany that conceives of tortious liability as split between two tracks - a fault-based track and a strict liability track - each with different normative foundations. Instead, Jansen asserts that there is no rigid distinction between the normative foundations of each form of liability. Rather, both fault liability and strict liability in German law, and indeed other European systems, are best considered as resting upon the unifying theoretical structure of outcome responsibility. The book thus places responsibility rather than wrongdoing at the centre of the normative

foundations of tort law. Historically, the book traces in detail how conceptions of tort liability have changed from Roman law to contemporary legal doctrine. It shows how particular historical understandings of the normative basis of tort law have led to continuing normative tensions in contemporary doctrine. Finally, the book examines how a reconstruction of modern German - and, indeed, European - law as based upon outcome responsibility should affect its doctrinal structure. This book makes contributions to the study of the theory, history, and doctrinal structure of tort law. While drawing on and explaining German tort law, its comparative, theoretical, and historical analysis will be of interest to scholars in all legal systems.

Leading historians and anthropologists with an interest in law gather to analyse the nature and meaning of law in diverse societies.

This volume contains Birks' notes on a series of lectures on the Roman law of obligations delivered in 1982. They give a comprehensive insight into his views on the topic, which are relevant in both a Roman context and also from a modern English perspective. The book examines, in turn, the law of contracts with its general principles and rule applications to the transactions mentioned in the Institutes; the law of delicts; and finally the miscellany of residual obligations from which the later categories of quasi-contracts and quasi-delicts, but also the modern law of unjust enrichment, emerged.

Borkowski's *Textbook on Roman Law* provides a clear and concise overview of Roman private law and civil procedure, supported by numerous extracts in translation from the Digest and Institutes. The book has been written with undergraduate students in mind and covers all key areas commonly taught on Roman law courses at undergraduate level.

Borkowski's *Textbook on Roman Law* provides a thorough and engaging overview of Roman private law and civil procedure. It is the ideal course companion for undergraduate Roman law courses, combining clear, comprehensible language and a wide range of supportive learning features with the most important sources of Roman law.

This accessible, readable book looks at the cultural study of the Bible, challenging the traditional mode of reading the women in the Bible. Alice Bach applies literary theory, cultural representations of biblical figures, films, and paintings to a close reading of a group of biblical texts revolving around the 'wicked' literary figures in the Bible. She compares the biblical char-

acter of the wife of Potiphar with the Second Temple Period narratives and rabbinic midrashim that expand her story. She then reads Bathsheba against a Yiddish novel by David Pinski, and finally looks at the Biblical Salome against a very different Salome created by Oscar Wilde, and the selection of Salomes created by Hollywood. Bach argues that biblical characters have a life in the mind of the reader independent of the stories in which they were created, thus making the reader the site at which the texts and the cultures that produced them come together.

The rights of the embryo and the foetus under Dutch law (V. Derckx and E. Hondius) . Regulating electronic commerce in the Netherlands (C. Prins)

This book is widely regarded as one of the most remarkable achievements in Roman Law and Comparative Law scholarship this century - a fact attested to by the universal acclaim with which it has been received throughout Europe, America, and beyond. As a work of Roman Law scholarship it fuses the vast volume of 20th century scholarship on the Roman law of obligations into a clear and very readable (and in many ways original) account of the law. As a work of comparative law it traces the transformation of the Roman law of obligations over the centuries into what is now modern German, English and South African law, presenting the reader with a contrast between these legal systems which is unique both in its scope and its depth. As a whole the book is written with a deep understanding of human nature and of many social, economic, and other forces that determine the face of the law.

In *Making Manslaughter*, Susanne Pohl-Zucker analyses the production and application of legal categories and procedures aimed at the resolution of homicides com-

mitted during heated disputes. Parallel studies explore distinct legal practices in Württemberg and Zurich between 1376 and 1700.

An essential collection of Raymond Westbrook's groundbreaking work on the cross-cultural history of ancient law. Throughout the twelve essays that appear in *Ex Oriente Lex*, Raymond Westbrook convincingly argues that the influence of Mesopotamian legal traditions and thought did not stop at the shores of the Mediterranean, but rather had a profound impact on the early laws and legal developments of Greece and Rome as well. He presents readers with tantalizing fragments of early Greek or archaic Roman law which, when placed in the context of the broader Near Eastern tradition, suddenly acquire unexpected new meanings. Before his untimely death in July 2009, Westbrook was regarded as one of the world's leading authorities on ancient legal history. Although his

main field was ancient Near Eastern law, he also made important contributions to the study of early Greek and Roman law. In his examination of the relationship between ancient Near Eastern and pre-classical Greek and Roman law, Westbrook sought to demonstrate that the connection between the two legal spheres was not merely theoretical but also concrete. The Near Eastern legal heritage had practical consequences that help us understand puzzling individual cases in the Greek and Roman traditions. His essays provide rich material for further reflection and interdisciplinary discussion about compelling similarities between legal cultures and the continuity of legal traditions over several millennia. Aimed at classicists and ancient historians, as well as biblicists, Egyptologists, Assyriologists, and legal historians, this volume gathers many of Westbrook's most important essays on the legal aspects of Near Eastern cultural influences on the Greco-Roman world, including one new,

never-before-published piece. A preface by editors Deborah Lyons and Kurt Raaflaub details the importance of Westbrook's work for the field of classics, while Sophie Démare-Lafont's incisive introduction places Westbrook's ideas within the wider context of ancient law.

Why did the Gentile church keep Old Testament commandments about sex and idolatry, but disregard many others, like those about food or ritual purity? If there were any binding norms, what made them so, and on what basis were they articulated? In this important study, Markus Bockmuehl approaches such questions by examining the halakhic (Jewish legal) rationale behind the ethics of Jesus, Paul and the early Christians. He offers fresh and often unexpected answers based on careful biblical and historical study. His arguments have far-reaching implications not only for the study of the New Testament, but more broadly for the relationship between Christianity and Judaism.
