Set your pulse racing with this stunning visual guide to over 1000 pin-up machines - iconic symbols of wanderlust, speed, and the open road. From Gottlieb Daimler's gas-powered "engine on a bicycle" which set fire to the seat on its first outing, to superbikes such as the Ducati 916, The Motorbike Book takes you on an enthralling tour of the bike's history. It shows you bikes that appeal to the head - practical forms of transport - and to the heart - a parade of classic pin-ups including cult machines such as the Honda RC30, the Triumph Bonneville and the Harley-Davidson XR750. The Motorbike Book shows the brilliance and impracticality of different designs and features detailed cross-sections of engines such as the air-cooled two-stroke. Winner of an American Educational Studies Association Critics' Choice Award and Choice Magazine's Outstanding Academic book award, and voted one of Teacher Magazine's "great books," Other Peo-

ple's Children has sold over 150,000 copies since its original hardcover publication. This anniversary paperback edition features a new introduction by Delpit as well as new framing essays by Herbert Kohl and Charles Payne. In a radical analysis of contemporary classrooms, MacArthur Award-winning author Lisa Delpit develops ideas about ways teachers can be better "cultural transmitters" in the classroom, where prejudice, stereotypes, and cultural assumptions breed ineffective education. Delpit suggests that many academic problems attributed to children of color are actually the result of miscommunication, as primarily white teachers and "other people's children" struggle with the imbalance of power and the dynamics plaguing our system. A new classic among educators, Other People's Children is a must-read for teachers, administrators, and parents striving to improve the quality of America's education system.

Starring Christopher Bale, Michael Caine, Gary Oldman, Cillian Murphy and Morgan Freeman, the trilogy commenced with *Batman Begins*, which traced the origins of how Bruce Wayne took on the role of the masked crusader to fight the forces of evil. But the Batman's adversaries in the first film paled in comparison to the forces of anarchy unleashed by *The Joker* in the second film, *The Dark Knight*. Physically and psychologically depleted by his encounter with *The Joker*, in *The Dark Knight Rises*, Batman must marshal all his forces to meet the threat to Gotham City posed by the masked villain Bane. These three films form a trilogy unique in the history of cinema - and express a dark imaginative vision that reflects the uncertainties of the 21st century. Nominated for thirteen BAFTA awards and nine Oscars, the *Dark Knight Trilogy* starred Christian Bale, Michael Caine, Tom Hardy, Gary Oldman and Morgan Freeman. Christopher Nolan's other films include *Insomnia*, *Memento*, *Inception* and most recently *Interstellar* starring Matthew McConaughey and Anne Hathaway.

Italian motorcycles have a place in history - and many enthusiasts' hearts - out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati's achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have been thousands. This is partly because there were so many engines available off the shelf - many of them English - as well as a thriving accessory and component industry. *A-Z of Italian Motorcycle Manufacturers* only deals briefly with the grand marques Ducati and Moto Guzzi because

there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

Few launch vehicles are as iconic and distinctive as NASA's behemoth rocket, the Saturn V, and none left such a lasting impression on those who watched it ascend. Developed with the specific

brief to send humans to the Moon, it pushed rocketry to new scales. Its greatest triumph is that it achieved its goal repeatedly with an enviable record of mission success. Haynes' Saturn V Manual tells the story of this magnificent and hugely powerful machine. It explains how each of the vehicle's three stages worked; Boeing's S-IC first stage with a power output as great as the UK's peak electricity consumption, North American Aviation's S-II troubled second stage, Douglas's workhorse S-IVB third stage with its instrument unit brain - as much a spacecraft as a rocket. From the decision to build it to the operation of its engines' valves and pumps, this lavishly illustrated and deeply informative book offers a deeper appreciation of the amazing Saturn V.

In 1998 the author, a professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone."

Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Lights glowed brightly in the large, bare tower room which was the headquarters of the Gerka, secret police organization of Rubania. It was midnight and a meeting of the supreme council of the Gerka at that hour could mean only the most urgent business. Residents of Kratz, the capital of Rubania, who happened to be in the streets that night and who saw the lights in the tower of the government palace shook their heads and hurried on their way with fear in their hearts for the Gerka was the most dangerous organization in all Rubania and for that matter one of the most powerful groups of secret police in the whole world. The creation of the new Europe which had followed the World War had resulted in the formation of Rubania, a rich, fertile land east of Prussia. It had been made a free state but Alex Reikoff, an unscrupulous dictator with a lust for world power, had risen to supreme command of the government, crushing out all opposition. He had built up the armed forces of his country until Rubania was recognized as a world power, feared for the might of its armada of submarines and the power of its fleets of airplanes, for Reikoff believed in the power of aircraft as an instrument of war. That the midnight meeting of the Gerka was of unusual importance was borne out when Reikoff himself strode into the room and took his place at the head of the table around which a half dozen men were seated. They looked expectantly at him. Reikoff, short and dark with closely cropped hair, stroked his bristly mustache. He looked intently at the men before him. One after another met his gaze until his eyes looked into those of Serge Larko, in the uniform of a lieutenant of the air force. "Ah, Serge," said Reikoff, "I'm glad that you could leave your beloved flying machines long enough to answer my call." "Yes, Excellency," smiled Serge. "I came at once but there is much that remains to be done on the new XO5 before it will be ready for the long flights for which it has been designed." "The XO5 must be ready for a six thousand mile non-stop trip by the day after tomorrow," replied Reikoff, his words short and sharp. "I shall inform the commander of your field that you are to be given every possible assistance. An emergency has come up which makes it imperative that you go soon on a special mission." Serge, who was one of the newest members of the secret police, gasped at the news that he was to be assigned to special work. He had been trained in Germany at Friedrichshafen for service in the lighter-than-air division of the Rubanian air force and only recently had been shifted unexpectedly and without explanation to the airplane division where he had been given an intensive course in the handling of long-distance planes. For the last month he had been supervising the construction of the XO5, the latest type in Rubanian super air cruisers. Surprised though he was at the news that he had been selected for a special mission. Serge felt that he was ready for whatever task might be ordered. The dictator of Rubania spoke again, his words cracking through the midnight stillness of the room. "You are all well aware," he said, "that the United States is our only rival in the building of dirigibles. Their Los Angeles is antiquated now but their new Akron is superior to anything in the world. It is even a mightier fighting craft than the new Blenkko which we will launch next month. This must not be. We must be supreme in the air!"

On a rainy September morning that just so happens to be her sixteenth birthday, Ailen Bright, a

chicken-legged, straw-haired teenager, decides to commit suicide via drowning in the family bathtub. After an almost-successful suicide attempt number two, which lands her at the bottom of a lake, she learns that sirens are, in fact, real, and they want to turn her into one of them. An amazing, yet dark look into the mind and heart of a suicidal teenager, this urban fantasy follows Ailen's struggle to figure out the meaning of life, the unraveling of her confusing feelings for her theatrically goofy best friend Hunter, and her desperate battle for her father's love.
