Since 1958 the Maritime Administration has continuously conducted instructions in use of collision

avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I re-

mained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

Althusser & Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is pro-

duced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

The Asian Development Bank, along with the people and institutions of Asia and the Pacific and the rest of the world, believes in the strength of partnerships and collective action. At the core of this belief is a desire to initiate and develop partnerships that will help governments address health care needs of growing populations, particularly women and children. Public-private partnerships (PPPs) have evolved from this need to relate to one another and work together. Governments recognize that they cannot do the job alone, particularly in the health sector where new disease patterns and the impact of climate change demand innovative solutions, such as PPP in health programs and enterprises. This guidebook offers readers a guide for the development of a PPP in pharmacy services through six

simple, customizable steps. It looks at pharmacy services as an important component of a well-rounded health care and hospital systems. Through sustainable PPP in pharmacy services, people will have access to safe, effective, and affordable medicines.

How Bad Are Bananas? was a groundbreaking book when first published in 2009, when most of us were hearing the phrase 'carbon footprint' for the first time. Mike Berners-Lee set out to inform us what was important (aviation, heating, swimming pools) and what made very little difference (bananas, naturally packaged, are good!). This new edition updates all the figures (from data centres to hosting a World Cup) and introduces many areas that have become a regular part of modern life - Twitter, the Cloud, Bitcoin, electric bikes and cars, even space tourism. Berners-Lee runs a considered eye over each area and gives us the figures to manage and reduce our own carbon footprint, as well as to lobby our companies, businesses and government. His findings, presented in clear and even entertaining prose, are often surprising. And they are essential if we are to address climate change.

It hasn't taken Web developers long to discover that when it comes to creating dynamic, database-driven Web sites, MySQL and PHP provide a win-

ning open source combination. Add this book to the mix, and there's no limit to the powerful, interactive Web sites that developers can create. With step-by-step instructions, complete scripts, and expert tips to guide readers, veteran author and database designer Larry Ullman gets right down to business: After grounding readers with separate discussions of first the scripting language (PHP) and then the database program (MySQL), he goes on to cover security, sessions and cookies, and using additional Web tools, with several sections devoted to creating sample applications. This guide is indispensable for intermediate- to advanced level Web designers who want to replace their static sites with something dynamic. In this edition, the bulk of the new material covers the latest versions of both technologies: PHP 6 and MySQL 5. The book's publication date is likely to beat the official release of PHP 6, making it one of the first books available on the subject.

The 7th Edition of Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increas-

ingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more "multilateral." Suitable for all business majors, the text encourages students to learn how marketing managers work across business functions for effective corporate performance on a global basis and achievement of overall corporate goals. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

How many great ideas begin with a nagging thought in the middle of the night that should disappear by morning, but doesn't? For Daniel Shumski, it was: Will it waffle? Hundreds of hours, countless messes, and 53 perfected recipes later, that answer is a resounding: Yes, it will! Steak? Yes! Pizza? Yes! Apple pie? Emphatically yes. And that's the beauty of being a waffle iron chef—waffling food other than waffles is not just a novelty but an innovation that leads to a great end product, all while giving the cook the

bonus pleasure of doing something cool, fun, and vaguely nerdy (or giving a reluctant eater—your child, say—a great reason to dig in). Waffled bacon reaches perfect crispness without burned edges, cooks super fast in the two-sided heat source, and leaves behind just the right amount of fat to waffle some eggs. Waffled Sweet Potato Gnocchi, Pressed Potato and Cheese Pierogi, and Waffled Meatballs all end up with dimples just right for trapping their delicious sauces. A waffle iron turns leftover mac 'n' cheese into Revitalized Macaroni and Cheese, which is like a decadent version of a grilled cheese sandwich with its golden, buttery, slightly crisp exterior and soft, melty, cheesy interior.

The book offers historical and political explanations, a criticism of neoclassical and "common sense" models in comparative vocational education research, and an inspection of structures, institutions and "boosters" of the "dual system's" performance. The question, why German companies and private sector institutions "participate" not only in training but also in training design, targets a very clear behavioural difference between German entrepreneurs and the entrepreneurs of many other countries. It is largely a question concerning the social forces which have a decisive say in design, supervision and implementation of training. Klaus Schaack, economist, born 1947, has been working in the field of technical and vocational education and training (TVET) and international TVET cooperation for several German and foreign organizations since 1980. For ten years he has been TVET adviser

to the Laotian Ministry of Education, to the South Korean Ministry of Labour and several Korean training agencies including the HRD Service of Korea, the Korea Foundation of Polytechnic Colleges (KOPO) and the Korea Chamber of Commerce and Industry (KCCI).

A monumental work of history that captures the last days of the Third Reich as never before. Swansong 1945 chronicles the end of Nazi Germany and World War II in Europe through hundreds of letters, diaries, and autobiographical accounts covering four days that fateful spring: Hitler's birthday on April 20, American and Soviet troops meeting at the Elbe on April 25, Hitler's suicide on April 30, and finally the German surrender on May 8. Side by side, we encounter vivid, first-person accounts of civilians fleeing Berlin, ordinary German

soldiers determined to fight to the bitter end, American POWs dreaming of home, concentration-camp survivors' first descriptions of their horrific experiences, as well as the intimate thoughts of figures such as Eisenhower, Churchill, Stalin, Joseph Goebbels, and Hitler himself. These firsthand accounts, painstakingly collected and organized by renowned German author Walter Kempowski, provide the raw material of history and present a panoramic view of those tumultuous days. The more than 1,000 extracts include a British soldier writing to his parents to tell them there are no baths but plenty of eggs and chocolate, an American soldier describing "the tremendous burst of lilacs" as he approaches the Elbe, Mussolini wishing Hitler a happy birthday, Eva Braun bragging to a girlfriend about

what a "crack shot" she's become, and much more. An extraordinary account of suffering and survival, Swansong 1945 brings to life the end of Nazi Germany and the war in Europe.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.
