Data warehouses in the age of AI maturity involve collecting, storing, and exploring via data lakes, streaming and operationalizing, and predictions through AI.

#### 1st Edition - Elsevier

### Data Warehousing in the Age of Big Data | Krish Krishnan

... Data Warehousing in the Age of the Big Data will help you and your organization make the most of unstructured data with your existing data warehouse. As Big Data continues to revolutionize how we use data, it doesn't have to create more confusion.

The age banding for the analysis isn't yet decided, so, it may be 0-5 years, 5-10, 10+ or anything. Because of the lack of knowledge of the banding (and it may be that the reports will be run multiple times with different banding - it is all stats and we may want to skew the report by using different banding), holding the age in a band would seem wrong.

### **Storing and historizing "age" in a data warehouse - idea?**

In computing, a data warehouse (DW or DWH), also known as an enterprise data warehouse (EDW), is a system used for reporting and data analysis, and is considered a core component of business intelligence. DWs are central repositories of integrated data from one or more disparate sources. They store current and historical data in one single place that are used for creating analytical reports ...

### **Data warehouse - Wikipedia**

Few companies have realized a decent return on their investments in data warehousing technologies. As long as data warehouses fail to keep pace with big data, companies' prospects for obtaining an acceptable return may erode further. But they can buck this downward trend by evolving traditional data warehousing infrastructure into "analytics warehouses."

### **The Future of Data Warehouses in the Age of Big Data - CIO ...**

The digital age has brought several tipping points from all perspectives in the world of data. Today, all sizes, formats, types, and classes of data are being generated, and we need an infrastructure that can capture, transform, and analyze it as quickly as it is created. The technology landscape is evolving rapidly from an infrastructure and programming platforms perspective.
