Database Programming With C++ - experts-exchange.com

The code could have been written in a C style (without classes) because the MySQL API functions calls are in C format. But, to get a feel of object-oriented database programming with C++, classes are used. In many cases, we had to force its parameters to go with the essence of C++ by casting and converting occasionally.

Database Programming with C/C++

Thus, by the end of this article, we have learned how to connect your C/C++ program to database and perform manipulations. This article is contributed by Vinay Garg. If you like GeeksforGeeks and would like to contribute, you can also write an article and mail your article to contribute@geeksforgeeks.org. See your article appearing on the ...
