Explains how self-delusion is part of a person's psychological defense system, identifying common misconceptions people have on topics such as caffeine withdrawal, hindsight, and brand loyalty.

This is the first book by an author in the UK to take an in-depth look at colourism - the process of discrimination based on skin tone among members of the same ethnic group, whereby lighter skin is more valued than darker complexions. The African Diaspora in Britain

is examined as part of a global black community with shared experiences of slavery, colonization and neo-colonialism. The author traces the evolution of colourism within African descendant communities in the USA, Jamaica, Latin America and the UK from a historical and political perspective and examines its present impact on the global African Diaspora. This book is essential reading for educators and students and will appeal to anyone with an interest in the subject of race and identity who wants to understand why colourism - a psychological legacy of slavery still impacts people of African descent in the Diaspora today.

"While most books on architecture concentrate on spatial themes, 'Building time' explores architecture's temporal dimensions. Through a series of

close readings of buildings, both contemporary and classic, it shows why an understanding of time is critical to understanding good architecture. All buildings exist in time. Even if designed for permanence, they change, slowly but inevitably. They change use, they accrue history and meaning, they decay. Meanwhile, the sun traces a path in time through a building, as do the movements of the human body from room to room. Time, this book argues, is the framework for our spatial experience of architecture, and a key dimension of a building's structure and significance. Examining works by distinctive modern architects--from Eileen Gray to Álvaro Siza and Wang Shu--'Building time' is a book for theorists, designers, and anyone who wants to understand our experience of architec-

ture. Through it, theorists will find a way to rethink the fundamental premise of design work, while designers will rediscover the order and ideas that shape the world around them--its buildings, interiors, and landscapes."--- Page 4 of printed paper wrapper.

This is a book about men who love women. But it is not a collection of love stories. It is a study of the secret, erotic fantasies that men have always kept hidden, a taboo-shattering investigation that reveals the deepest, most conflicting feelings that men have about women, men and their own sexuality. *Men in Love* goes beyond the socio-sexual cliché of woman seen as either madonna or whore to reveal the conflict of love and rage at the centre of men's emotions and erotic desires. Based on thousands of candid responses from men ranging from their teens to their sixties,

Men in Love - startling and shocking - will change men's deepest feelings about their sexuality and make the women who care about them understand them as never before.

Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

The classic postapocalyptic thriller with "all the reality of a vividly realized nightmare" (The Times, London). Triffids are odd, interesting little plants that grow in everyone's garden. Triffids are no more than mere curiosities—until an event occurs that alters human life forever. What seems to be a spectacular meteor shower turns into a bizarre,

green inferno that blinds everyone and renders humankind helpless. What follows is even stranger: spores from the inferno cause the triffids to suddenly take on a life of their own. They become large, crawling vegetation, with the ability to uproot and roam about the country, attacking humans and inflicting pain and agony. William Masen somehow managed to escape being blinded in the inferno, and now after leaving the hospital, he is one of the few survivors who can see. And he may be the only one who can save his species from chaos and eventual extinction . . . With more than a million copies sold, *The Day of the Triffids* is a landmark of speculative fiction, and "an outstanding and entertaining novel" (Library Journal). "A thoroughly English apocalypse, it rivals H. G. Wells in conveying how the everyday invaded by the alien would feel. No wonder Stephen King admires Wyndham so much." —Ramsey Campbell, author of *The Overnight* "One of my all-time favorite novels. It's absolutely convincing, full of little telling details, and that sweet, warm sensation of horror and mystery." —Joe R. Lansdale, author

of *Edge of Dark Water*

The World as Will and Representation is the central work of the German philosopher Arthur Schopenhauer. One of the most important philosophical works of the nineteenth century, the basic statement of one important stream of post-Kantian thought. It is without question Schopenhauer's greatest work. Conceived and published before the philosopher was 30 and expanded 25 years later, it is the summation of a lifetime of thought. "...This book will be of interest to general readers, undergraduates, graduates, and scholars in the field." --George Lăzăroiu, PhD, Institute of Interdisciplinary Studies in Humanities and Social Sciences, New York, Analysis and Metaphysics

Batchelor coins the term "chromophobia"--A fear of corruption or contamination through color--in a meditation on color in western culture. Batchelor analyzes the history of, and the motivations behind, chromophobia, from its beginnings through examples of nineteenth-century literature, twentieth-century architecture and film to Pop art, minimalism and the art and architecture of the present day. He argues that there is a tradition of resistance

to colour in the West, exemplified by many attempts to purge color from art, literature and architecture. Batchelor seeks to analyze the motivations behind chromophobia, considering the work of writers and philosophers who have used color as a significant motif, and offering new interpretations of familiar texts and works of art.

When Betty Friedan produced *The Feminine Mystique* in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world. 'One of the most influential nonfiction books of the twentieth century.' *New York Times* 'Feminism began with the work of a single person: Friedan.' Nicholas Lemann

Writing in an age when the call for the rights of man had brought revolution to America and France, Mary Wollstonecraft produced her own declaration of female independence in 1792. Passionate and forthright, *A Vindication of the Rights of Woman* attacked the prevailing view of docile, decorative femininity, and instead laid out the principles of emancipation: an equal education for girls and boys, an end to prejudice, and for women to become defined by their profession, not their partner. Mary Wollstonecraft's work was received with a mixture of admiration and outrage. Hugh Walpole called her "a hyena in petticoats." Yet it established her as the mother of modern feminism.

Mein Kampf ("My Struggle") is an important historical document which should not be forgotten, it remains important to educate and explain clearly what this work set out to achieve. This book is the political manifesto and philosophical autobiography of Adolf Hitler. It became known as the 'bible' of National Socialism (Nazism) in Germany's Third Reich. The first volume, entitled "The Settlement "Revenge" was written in 1924 in the Ba-

varian fortress of Landsberg am Lech. It highlights the First World War, and the "betrayal" of Germany's collapse in 1918; it also expresses Hitler's racist ideology as well as revenge against France. It was considered proper to own a copy and to give one to newlyweds or to celebrate any similar occasion. Revelations concerning the nature of his character and his blueprint for Germany's future served as a warning to the world. A warning that was mostly ignored. This book contains both volumes and has been fully translated to English.
