### **B8PDJK - WATSON KYLEIGH**

This paper is the first to estimate the impact of exposure to deceptive advertising on consumption of the advertised product and its substitutes. We study the market for over-the-counter (OTC) weight-loss products, a market in which deceptive advertising is rampant and products are generally ineffective with potentially serious side effects.

Weight-loss products accounted for 13 percent of the fraud claims submitted to the F.T.C. in 2011, the most recent data available. That is more than twice the number in any other category.

THE EFFECT OF DECEPTIVE ADVERTISING ON CONSUMPTION OF THE ADVERTISED GOOD AND ITS SUBSTITUTES ... weight loss involve behavior modification: decreased calorie intake and increased physical activity resulting in weight loss of 1-2 pounds per week (NHLBI, 2000).

Health and Fitness Claims. Americans spend billions of dollars every year on supplements, foods and devices in hopes of improving their health and fitness. But not all of these products live up to the advertising claims that they can help people lose weight, combat disease, and improve their cognitive abilities. The Federal Trade Commission combats this type of deceptive advertising in ...

The Competition Bureau of Canada (the "Bureau") recently released the fifth volume of its Deceptive Marketing Practices Digest. In this latest edition, the Bureau has again focused on issues affecting consumers in the online marketplace, including deceptive privacy practices, unsubstantiated weight loss claims and the practice of "drip" pricing in the car rental industry.

The FTC held a workshop to explore alternate approaches to reducing deceptive claims in advertising for weight-loss products. Following up on the issuance of the FTC staff report, Weight-Loss Advertising: An Analysis of Current Trends, the workshop gave the FTC staff and interested parties an opportunity to discuss new strategies for fighting weight-loss fraud.
