Epidemiological Change and Chronic Disease in Sub-Saharan Africa offers new and critical perspectives on the causes and consequences of recent epidemiological changes in sub-Saharan Africa, particularly on the increasing incidence of so-called 'non-communicable' and chronic conditions. Historians, social anthropologists, public health experts and social epidemiologists present important insights from a number of African perspectives and locations to present an incisive critique of 'epidemiological transition' theory and suggest alternative understandings of the epidemiological change on the continent. Arranged in three parts, 'Temporalities: Beyond Transition', 'Numbers and Categories' and 'Local Biologies and Knowledge Systems', the chapters cover a broad range of subjects and themes, including the trajectory of maternal mortality in East Africa, the African smoking epidemic, the history of sugar consumption in South Africa, causality between infectious and non-communicable diseases in Ghana and Belize, the complex relationships between adult hypertension and paediatric HIV in Botswana, and stories of cancer patients and their families as they pursue treatment and care in Kenya. In all, the volume provides insights drawn from historical perspectives and from the African social and clinical experience to offer new perspectives on the changing epidemiology of sub-

-Saharan Africa that go beyond theories of 'transition'. It will be of value to students and researchers in Global Health, Medical Anthropology and Public Health, and to readers with an interest in African Studies.

"Nobody walks the knife-edge of hilarity and heartbreak more confidently than Pelletier."—Richard Russo In her exquisite new novel, acclaimed author Cathie Pelletier presents a witty and refreshingly candid portrait of grief, intergenerational conflict, and the impact one person can have on those he loved. Bixley, Maine. One year after Henry Munroe's fatal heart attack at age forty-one, his doting parents, prudish wife, rebellious son, and wayward brother are still reeling. So is Evie Cooper, a bartender, self-proclaimed "spiritual portraitist," and Henry's former mistress. While his widow, Jeanie, struggles with the betrayal, Henry's overbearing mother is making plans to hold a memorial service. As the date of the tribute draws closer and these worlds threaten to collide, the Munroes grapple with the frailty of their own lives and the knowledge that love is all that matters. With her trademark wry wit and wisdom, Cathie Pelletier has crafted an elegant and surprisingly uplifting portrait of the many strange and inspiring forms that grief can take in its journey toward healing.

Isaac Newton was accorded a semi-divine status in the 18th and 19th centuries, whereby his image linked together religion and science. The real human being behind the demi-god image has tended to be lost. He was a person who took credit from others, and crushed the reputations of those to whom he owed most. This most brilliant of mathematicians could alas be devious, deceptive and duplicitous. This work doesn't go looking at unpublished alchemical musings as is nowadays fashionable, rather it sticks to the historical record. At the time when the new science was born, we scrutinize the ways in which he failed to discover the law of gravity or invent calculus. What exactly did Leibniz mean by describing him as 'a mind neither fair nor honest'? Why did Robert Hooke describe him as 'the veriest knave in all the house' and why was the astronomer Flamsteed calling him SIN (Sir Isaac Newton)? We are here concerned to give him credit for what he did discover, which may not be quite what you had been told. This book redefines the genius of Isaac Newton, but without the heavily mythologised baggage of a bygone era. He believed in one God, one law and one bank.

Are humans at their core seekers of their own pleasure or cooperative members of society? Paradoxically, they are both. Pleasure-seeking can take place only within the context of what works within a defined community, and central to any community are the evolved codes and principles guiding appropriate behavior, or morality. The complex interaction of morality and self-interest is at the heart of Geoffrey M. Hodgson's approach to evolutionary economics, which is designed to bring about a better understanding of human behavior. In *From Pleasure Machines to Moral Communities*, Hodgson casts a critical eye on neoclassical individualism, its foundations and flaws, and turns to recent insights from research on the evolutionary bases of human behavior. He focuses his attention on the evolution of morality, its meaning, why it came about, and how it influences human attitudes and behavior. This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn from diverse environments, including the business world and crucial policy realms like health care and ecology. This book provides a valuable complement to Hodgson's earlier work with Thorbjørn Knudsen on evolutionary economics in *Darwin's Conjecture*, extending the evolutionary outlook to include moral and policy-related issues.

'All in?' Kieran pulled me up, and the others followed. We gathered around the

bigger tree. No one asked Matty - he just reached up and put his right hand on the trunk with ours. Kieran cleared his throat. 'We swear, on these trees, to always be friends. The clan Gillean

He was named "Sham" for the sun, this golden-red stallion born in the Sultan of Morocco's stone stables. Upon his heel was a small white spot, the symbol of speed. But on his chest was the symbol of misfortune. Although he was swift as the desert winds, Sham's pedigree would be scorned all his life by cruel masters and owners. This is the classic story of Sham and his friend, the stable boy Agba. Their adventures take them from the sands of the Sahara to the royal courts of France, and finally to the green pastures and state-

ly homes of England. For Sham was the renowned Godolphin Arabian, whose blood flows through the veins of almost every superior thoroughbred. Sham's speed—like his story—has become legendary.

Nature, money, work, care, food, energy, and lives: these are the seven things that have made our world and will shape its future. In making these things cheap, modern commerce has transformed, governed, and devastated Earth. In *A History of the World in Seven Cheap Things*, Raj Patel and Jason W. Moore present a new approach to analyzing today's planetary emergencies. Bringing the latest ecological research together with histories of colonialism, indigenous struggles, slave revolts, and other rebellions and uprisings, Patel and Moore demonstrate that throughout history, crises have always prompted fresh strategies to make the world cheap and safe for capitalism. At a time of crisis in all seven cheap things, innovative and systemic thinking is urgently required. This book proposes a radical new way of understanding—and reclaiming—the planet in the turbulent twenty-first century.
