A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a

work of art. It's more like a sandwich: convenient and nourishing.

The Constitution was one of the first frigates built by the fledgling U.S. Navy, ordered in 1794 as a counter to the Barbary corsairs in the Mediterranean. Heavily built but fast, she was rated as a 44-gun ship but mounted thirty 24-pounder cannons. Her most famous encounter came in 1812 when she successfully fought against the HMS Guerriere, earning the nickname "Old Ironsides" when the British round shot could not penetrate her walls. Built in Boston where she has been berthed for over seventy years, she is considered to be the oldest commissioned warship afloat in the world. The internationally-acclaimed draftsman and author Karl-Heinz Marquardt worked closely with the team at the Constitution to ensure that the book is accurate and up-to-date. Dozens of photographs and some 100 perspective and 3-view drawings are included along with fully descriptive keys and a large-scale foldout plan on the reverse side of the jacket.

One of the most profound changes in business and society is the emergence of the post-Millennial generation, Gen Z. While every new generation has faced its share of disruption in technology, economics, politics and society, no other generation in the history of mankind has had the ability to connect every human being on the planet to each other and in the process to provide the opportunity for each person to be fully educated, socially and economically engaged. What might this mean for business, markets, and educational institutions in the future? In this revolutionary new book, *The Gen Z Effect: The Six Forces Shaping the Future of Business*, authors Tom Koulopoulos and Dan Keldsen delve into a vision of the future where disruptive invention and reinvention is the acknowledged norm, touching almost every aspect of how we work, live and play. From radical new approaches to marketing and manufacturing to the potential obliteration of intellectual property and the shift to mass innovation, to the decimation of our oldest

learning institutions through open source and adaptive learning, The Gen Z Effect provides a mind-bending view of why we will need to embrace Gen Z as the last, best hope for taking on the world's biggest challenges and opportunities, and how you can prepare yourself and your business for the greatest era of disruption, prosperity, and progress the world has ever experienced.

In 1970, Sylvia Wilkinson was a writer in the category known as 'young Southern Woman Novelist'. While her novels and teaching paid the bills she had a passion for motorsports that led her to write *The Stainless Steel Carrot: An Auto Racing Odyssey*. The book profiled young up-and-coming road racer John Morton as he raced the BRE Datsun 510 in the 1971 and 1972 SCCA Trans-Am 2.5 Challenge. John won the championships and continued on a road-racing career that saw dozens of championship level victories around the country and abroad. The book, well regarded among both racers and general audience readers, has been out of print since 1973. Original copies often sell for over \$100 online and at collectors events. Now, thanks to years of requests from fans, and Sylvia's interest in animals, the book is re-published with additional material. -- Amazon.com.
