Learn the skills essential to clinical practice with Foundations and Adult Health Nursing, 8th Edition! This all-inclusive guide to fundamentals and medical-surgical nursing for the LPN/LVN covers everything from anatomy and physiology to nursing interventions and maternity, neonatal, pediatric, geriatric, mental health, and community health care. Guidelines for patient care are presented within the framework of the nursing process; Nursing Care Plans are described within a case-study format to help you develop skills in clinical de-

cision-making. In addition, the accessible, friendly overall style and clearly written review questions helps you to prepare for the NCLEX-PN® examination. Clear coverage of skills across the human lifespan includes maternity, pediatrics, adults, and older adults. Full-color, step-by-step instructions for over 110 skills show nursing techniques and procedures along with rationales for each. Tenth grade reading level helps you to understand complex topics. Skills are presented in a step-by-step format with clearly defined nursing actions and rationales. Mathematics review in Dosage Cal-

culatation and Medication Administration chapter covers basic arithmetic skills prior to the discussion of medication administration. Safety Alerts cover issues related to safe patient care in a variety of settings. Health Promotion Considerations boxes highlight information on wellness and disease prevention, including infection control, diet, and pregnancy. Nursing Care Plans emphasize patient goals and outcomes within a case-study format, and promotes clinical decision-making with critical thinking questions at the end of each care plan. Patient Teaching boxes include post-hospital discharge

guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Communication boxes illustrate communication strategies using real-life examples of nurse-patient dialogue. Lifespan Consideration boxes provide you with age-specific information for the care of the patient. Home Health Considerations boxes discuss issues facing patients and their caregivers in the home setting. Get Ready for the NCLEX® Examination section at the end of each chapter provides Key Points, Review Questions, and Critical Thinking Activities to reinforce learning. Coordinated Care boxes promote comprehensive patient care with other members of the health care team, focusing on prioritization, assignment, supervision, collaboration, delegation, and leadership topics. A fundamental, reader-friendly guide to evidence-based practice (EBP) for BSN, MSN, and DNP nursing students, Evidence-Based Practice in Nursing explains the conceptual underpinnings of EBP and demonstrates how nurses can put EBP concepts into practice. Replete with critical knowl-

edge, skills, tools, and scholarly development to enable nurses to fully and confidently deliver the highest-quality EBP care, this book eschews a one-size-fits-all approach unique systematic guidelines for understanding and applying EBP. Building blocks of information grow progressively more complex to apply to any point along nursing's academic trajectory. Thoughtfully organized to fit a variety of EBP-related course objectives, Evidence Based Practice in Nursing easily adapts for standalone EBP courses at any level as well as advanced practice specialty courses that integrate EBP content. This book addresses the needs of all nursing instructors, including those who teach at multiple levels simultaneously. Key content discusses requisite conceptual knowledge of EBP for building clinical decision-making skills; conceptualizing, implementing, and evaluating EBP projects; conducting translational research and quality improvement for implementation and evaluation of EBP; developing leadership and structural empowerment strategies; and analyzing how students at each degree/level work with EBP indepen-

dently, inter-professionally, and intraprofessionally. Chapters align with AACN essentials. Key Features: Follows a methodical systematic trajectory building from simple to complex concepts Includes abundant examples demonstrating both negative and positive EBP applications Enables instructors to adopt one textbook for BSN, MSN, and DNP students Includes practical design templates for developing EBP information plans with critical guideposts Provides a quality improvement toolkit, key words and concepts, illustrative tables, and figures The fourth Australian edition of Kozier and Erb's Fundamentals of Nursing has undergone a rigorous review and writing process and reflects the contemporary changes in the regulation of nursing. It continues to focus on the three core philosophies of person-centred care, critical thinking and clinical reasoning and cultural safety. These three philosophical foundations are interwoven in a meaningful way through each chapter. With an evidence-based approach, students will develop skills in problem solving, critical thinking, clinical reasoning and learn to care for people in ways

that signify respect, acceptance, empathy, connect- edness, cultural sensitivi- ty and genuine concern. MyLab Nursing can be packaged with this edition to engage students and al- low them to apply their knowledge, strengthen their understanding of key concepts and develop criti- cal decision making skills. Note: This edition pro- vides relevant nursing di- agnoses written in a way that is reflective of Aus- tralia nursing practice and nomenclature and does not refer to NANDA taxon- omy of diagnostic termi- nology.

Nursing knowledge and practice is a comprehensive textbook which forms an ideal basis for foundation nursing students. The core emphasis in the organisation and presentation of knowledge in this third edition remains focused on the in-depth knowledge required by nurses to deliver care in the practice setting. The

chapter contents encompass knowledge that applies to all branches of nursing e.g. Communication, Confusion, Aggression and Rehabilitation Safety and Risk, Infection Control, Medicines etc. The structure of all chapters is unique in integrating knowledge from subject areas often taught separately in the nursing curriculum. This enables the foundation student to integrate this range of knowledge in making decisions about the delivery of nursing care to patients/clients in all fields of nursing. Exercises are included to encourage reflection on practice and develop critical thinking skills. It also promotes the expansion of professional knowledge through the development of portfolio evidence. Building on the outstanding success of previous editions the authors have drawn extensively on current best evidence, including research, policy and substantial internet based resources, reflecting UK and international perspectives.

- Each chapter begins with an overview of the content and concludes with a summary to help evaluate learning
- Case studies reflect the diverse range of client needs and care settings of the four nurs-

ing branches and help relate theory to practice

- Reflective exercises and suggestions for portfolio evidence, along with decision-making activities, promote reflection on personal experience and links to nursing practice using a problem-based approach
- Current research is highlighted throughout, demonstrating the evidence-base for practice decisions.
- Key web sites, annotated further reading and references encourage readers to pursue contemporary evidence that underpins competency-based practice. Full colour throughout

Content fully updated in line with developments in clinical practice, teaching requirements and the evidence-base

Fundamentals of Person-Centred Healthcare Practice presents evidence-based perspectives on a broad range of approaches to person-centred practice in healthcare. Featuring contribu-

tions from internationally recognised experts in the field, this valuable textbook helps students and staff across healthcare disciplines understand the essential concepts of person-centred practice in various health-related contexts. Using the Person-centred Practice Framework—an innovative theoretical model based on more than two decades of research and practice—students develop a strong understanding of the different components of person-centredness, their connections and interactions, and how they can be implemented to promote positive healthcare experiences for care providers, service-users, and families. Recognising the dynamic and complex nature of person-centredness, the text emphasises the importance of a common language and a shared understanding of person-centred practice in all areas of healthcare, from hospital and social care systems, to mental health, learning disability, and rehabilitation services. This practical and insightful introduction to the subject: Provides engaging, student-friendly coverage of the central principles and practice of person-centredness within a multi-professional and in-

terdisciplinary context Features cases and examples of person-centred practice in curricula worldwide Includes activities designed to support person-centred practitioner development Discusses the future of person-centred facilitation, learning and practice Offers real-world guidance on providing a holistic approach to developing person-centred relationships that facilitate meaningful connections with others Fundamentals of Person-Centred Healthcare Practice is an indispensable resource for nursing and allied health professionals, and an important reference work for educators, facilitators, supervisors and healthcare practitioners.

This textbook aims to focus on the core knowledge, skills and attitudes which should be common to all rehabilitative roles regardless of client groups or the setting of care. It aims to develop an appropriate knowledge base for the development of rehabilitation nursing practice. The book is divided into three main sections 1 General Issues, covering the context in which rehabilitation nursing takes place, and providing the reader with an understanding of the theoretical frameworks and

concepts which underpin rehabilitation. 2. Care planning, is devoted to the nurses role in rehabilitation , explored in the context of care planning and rehabilitation. 3. Issues in Rehabilitation, is intended to challenge thinking about rehabilitation by focussing on some more controversial issues within rehabilitation and nurses role within it.

Covering the issues, themes and principles that explain what it means to be a nurse today, this book provides the theory students need to know and applies it to the diverse patient groups and settings that students will encounter on their placements. Key features of the book are:

- Introduces the core aspects of adult nursing
- An evidence-based approach with discussion of literature, policy and research and suggested further reading for every chapter
- Over 30 case studies to help students understand the realities of practice across a range of settings including primary care and the community
- Stop and think boxes which challenge assumptions and encourage reflection

A companion website with sample questions for lecturers to use in seminars, multiple choice questions for student revision and free SAGE journal articles. The book has been closely developed in line with the NMC Standards and Essential Skills Clusters and supports students across their entire degree programme as they develop into nurses of the future ready to deliver and lead care.
