For those seeking a fresh, contemporary approach to the stories and themes of Genesis, this book offers an inspiring gateway into the heart of the ancient text. Both newcomers and seasoned readers will benefit from Rabbi Leila Gal Berner's invitation to personal contemplation. Basing her work on a Christian method of reading Scripture—lectio divina (reading the holy)—Rabbi Berner's adaptation for Jews as kariat ha-kodesh (reading the sacred) is welcoming and accessible to readers of all faiths. After retelling each story from a very human perspective, Rabbi Berner advances rabbinic perspectives that have illuminated each biblical saga over the centuries. In addition, she brings the text to life with contemporary stories of real people whose experiences echo the biblical stories. A final section to each chapter suggests probing questions for personal contemplation and meditation, which can be used both by individual readers as part of a spiritual practice and also by groups of spiritual seekers. Group leaders will find a helpful facilitator's guide to structure their sessions. Beginning with Rabbi Berner's own classes, groups have formed throughout North America using her method.

Dictations for Discussion is an intermediate-to-advanced-level text intended to improve the listening and speaking skills of ESL students. Reading and writing are also reinforced, along with progress in vocabulary and grammar. This book contains contributions from the IX International Scientific Conference “Digital Transformation of the Economy: Challenges, Trends and New Opportunities,” which was organized by Samara State University of Economics (SSEU, Samara, Russia), 2021, and devoted to the 90th anniversary of this higher education institution. Digital technologies became even more in demand during the pandemic, when companies, state authorities, and educational organizations were forced to switch to a remote format of work. The “forced” digitization of the usual ways of activity required rapid and decisive changes. Understanding the ongoing digital transformation implies the relevance of further in-depth research of this issue in the context of various socioeconomic systems, interdisciplinary interactions, and cooperation between scientists and practitioners. The book is an attempt to analyze these changes and consider them from the point of view of various scientific areas (economics, management, education, law, sociology, and others). This book addresses theoretical and practical aspects by studying the digital technology application in terms of the new socioeconomic reality development: big data in the digital economy, data collection and exchange, artificial intelligence, intelligent communications, digital platforms and strategies for the sustainable development of socioeconomic systems, and new requirements of professional and business education. It provides significant value for scientists, teachers, and students of higher educational institutions.

As a child needs nutrient-rich calories to grow healthily, so God’s people experience maturation through consistent, Spirit-empowered feedings from the Bible prepared by a capable, Spirit-filled chef. This is why Paul emphatically charged Timothy, an overseer of a local congregation, to unwaveringly and unrelentingly “preach the word” (2 Tim 4:1-2), a task that assumes not only Scripture’s right explanation but also its valid application. Unfortunately, while much scholarly attention has been paid to the former facet, less has been given to the latter. One homiletician, Abraham Kuruvilla (Privilege the Text! A Theological Hermeneutic for Preaching), has recently attempted to fill this void by articulating and demonstrating a methodology through which a preacher can, with confidence and clarity, lead the people of God from the word of God to its intended, and thus binding, application. This work explores the effectiveness of his proposed theology and hermeneutic for the identification, development, communication, and reception of biblically founded, theologically valid, and hearer-relevant application.

“Nineteen Eighty-Four: A Novel”, often published as “1984”, is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell’s ninth and final book completed in his lifetime. Thematically, “Nineteen Eighty-Four” centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates “Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases.” - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance... Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.
