*Dyeing Process Kisco - worker-redis-3.hipwee.com*

The traditional dyeing process is described as a black box, in which the amount of dye on the fabric is not known until the dyeing is completed. Advances in spectrophotometry and computation have enabled an indirect determination of the amount of dye on fabric during the dyeing process based on Beer's law. The principles of a dyebath monitoring technology that allow the analysis and control of the dyeing process are introduced.
