#### ERCO, the Light Factory. - YouTube

ERCO develops luminaires with the specifications of good glare control and high visual comfort. UGR values are used as support for purely norm-referenced lighting. With downlights though this should not be carried out using 'blanket' values, but should be implemented according to the individual arrangement of luminaires in the room.

ERCO's range of indoor luminaires embraces a wide spectrum of different lighting tools: spotlights and wallwashers, track and light structures, recessed luminaires, ceiling washlights and floor washlights. They all share a common guiding design principle of efficient visual comfort.

E. Guide Designing with light | Architectural lighting | Lighting interior spaces Defining spatial borders. Observation. Floor illumination emphasises objects and pedestrian surfaces.

The lighting is only one component, operation of solar screen equipment, air-conditioning and security systems are others. Special lighting control systems have the advantage that they can be

With Midipoll, ERCO presents a bollard luminaire in the context of efficient visual comfort. Its innovative photometrics with special prismatic lens effectively project the luminous flux onto the target surface — without causing glare, therefore fulfilling dark sky requirements. The night can emerge and the stars are visible.
