What does the white evangelical want? In our moment of crisis and rage, this question is everywhere. Scholars ask from where its desires emerged, pundits divine its political future, and the public asks how we lapsed into social chaos. For their part, white evangelicals feel misunderstood while failing to see the direction of their ambitions. We must interrogate its aims

not only through its past or current trends but also through the various fantasies by which it rejects and enlivens reality. Against traces five zones of opposition: future, knowledge, sexuality, reality, and society. If climate change is the greatest threat civilization has ever faced, then a faith aiding collapse must face analysis. If it swims in assured forgiveness, it feels no shame for its sins against humanity. If it wants a king, it threatens democracy. If it veils xenophobia, it shall be ever more cruel. In a critical and accessible history of odd ideas, DeLay chronicles the past and sketches its troubling future. It might die, but what's certain is that a faith built on nostalgia and supremacy won't moderate. We live in dangerous times, so let us consider its justifications,

turmoil, appetite, and catastrophe.

lected answers at the end of the book allow students to assess their progress.

This Handbook brings together contributions from leading scholars who take an economic perspective to study peace and conflict. Some chapters

are largely empirical, exploring the correlates and quantifying the costs of conflict. Others are more theoretical, examining the mechanisms that lead to war or are more conducive to peace.

This book surveys the history of African-American Christian churches through the study of fourteen notable black clergymen. In addition to the challenges that normally confront heralds of the gospel, African American Christians also faced slavery and racial discrimination. Their deep love for Christ and their fellow believers and their passion

for lost souls made them dauntless soldiers for the Lord, proclaiming the way of salvation and the equality of all men and women in God's sight. - Publisher. "This book insists that history matters. What if current divisions in America rest, in part, on a fundamental divergence in the understanding of our history? The book proposes the three most prominent Christian curricula have played a role through the historical narrative promoted for almost fifty

years, becoming more widespread in different forms of alternative schooling from Christian schools to voucher programs, and homeschooling. Their narrative has been significant in defining Americans' understanding of the world and its history and exposes the efficacy of the alliance between certain religious interests, conservative legislators and school boards, and various corporate interests in reshaping education in the United States. The campaign for a "Christian right history" is analogous to the successful advocacy for "intelligent design" in public school science curricula. Many conservative institutions support both the inclusion of politically conservative and Christian content into school curricula"--

During this

course, students will study the foundations of our country, the Constitution, the three branches of government, and political parties and politics.-- from publisher's description.

The Religious Right's most dogmatic and resolute faction has its roots in three generations of the Bob Jones family of Greenville, South Carolina. *An Island in the Lake of Fire* is the first in-depth history of this militantly separatist, ultrafundamentalist dynasty to be written by an "outsider" with the Joneses' cooperation. Mark Taylor Dalhouse focuses on Bob Jones University (BJU) and the three colorful, charismatic Jones patriarchs, who, in succession, have led the school. Founded in 1927, BJU has a student population of five thousand; in addition, it boasts thousands more loyal, well-placed alumni not only in pulpits and Christian day schools across the country but also in elective offices and major corporations. Through their BJU network, and by their vigilance as self-appointed theological watchdogs, the Joneses have, since the 1950s, played a pivotal role in defining the extreme limits of American religious and cultural conservatism. Billy Gra-

ham and Jerry Falwell (whom Bob Jones Jr. labeled the "most dangerous man in America") are among the leading figures who have not measured up to BJU's fundamentalist standards. The defining doctrine at BJU, says Dalhouse, is separation from secularism in the modern world. Drawing on interviews with Bob Jones Jr., Bob Jones III, and others at BJU, as well as on hitherto inaccessible archival sources at the school, Dalhouse discusses the school's separatism in light of such factors as its refusal to seek accreditation and the stringent codes of dress, conduct, and even thought to which BJU students submit themselves. Attuned to the ironies and contradictions of the Joneses' separatist enterprise, Dalhouse points to the high proportion of accounting and finance degrees awarded at BJU, the school's widely admired cinema department (which has a Cannes Film Festival award to its name), and its nationally acclaimed Baroque and Renaissance art gallery. Dalhouse also challenges some widely held impressions about BJU that have circulated among its detractors, including assumptions about the regional

makeup of the student body, and about the prospects of BJU students to gain entry into graduate programs at other schools. Filled with insights into the attitudes and personalities of the Joneses, *An Island in the Lake of Fire* offers a unique window into their influential, yet generally unrecognized, place in right-wing Christianity.

Students will also learn about issues related to national economic systems and policies. - Publisher.

This fifth volume of the *Governance of Security (GofS) Research Paper* series addresses a wide variety of topical issues focusing on European criminal justice and financial and economic crime. The first cluster of articles is concerned with European criminal justice matters particularly relating to EU mutual recognition, such as: conceptualization, unwanted effects in the context of prisoner transfer and sentence execution, impact for cross-border gathering and use of forensic expert evidence, and interrogational fairness standards. A second cluster of articles addresses the subjects of financial and economic crime, ranging from informal economy (among street children) to formal/informal economy (vulnerability of the hotel and catering industry to crime) and white

collar crime phenomena like (transnational) environmental crime and corruption. A final cluster groups together a variety of selected topical issues, including juvenile offending and mental disorders, desistance theories, and sexually transmitted infections.

*Nonlinear Time Series Analysis of Economic and Financial Data* provides an examination of the flourishing interest that has developed in this area over the past decade. The constant theme throughout this work is that standard linear time series tools leave unexamined and unexploited economically significant features in frequently used data sets. The book comprises original contributions written by specialists in the field, and offers a combination of both applied and methodological papers. It will be useful to both seasoned veterans of nonlinear time series analysis and those searching for an informative panoramic look at front-line developments in the area.

Various imperfections in existing market systems prevent the free market from serving as a truly efficient allocation mechanism, but optimization of economic activities pro-

vides an effective remedial measure. Cooperative optimization claims that socially optimal and individually rational solutions to decision problems involving strategic action over time exist. To ensure that cooperation will last throughout the agreement period, however, the stringent condition of subgame consistency is required. This textbook presents a study of subgame consistent economic optimization, developing game-theoretic optimization techniques to establish the foundation for an effective policy menu to tackle the suboptimal behavior that the conventional market mechanism fails to resolve.

This book began when a letter reached my desk in November 1989. Written by Warren Samuels, professor of economics at Michigan State University and editor for Kluwer Academic Publishers, the letter reviewed the philosophy behind Kluwer's series on recent economic thought and accordingly expressed interest in the controversies that surround contemporary topics in the discipline. It graciously went on to invite me to organize, consonant with that philosophy, a volume of chapters on saving. Soon thereafter I

learned that the chapters were to be original compositions. I also learned that I would have substantial flexibility in structuring the volume and in recruiting contributors, who logically would be authorities in the field. Succinctly, Samuels was inviting me to work with leading scholars in exploring the current controversies in saving, one of my favorite subjects. That invitation was simply too tempting to refuse. Preparation of the book's outline went smoothly. It was obvious that the statistics of saving should be covered along with the theories of saving. It was equally obvious that special issues must be addressed: Ricardian Equivalence, supply-side doctrine, and economic development among others. These themes should be handled so as to bring out the ideological tensions in the profession, and that criterion helped to shape the list of potential contributors. That is, both sides of a conflict should be represented, and both should be given the same treatment.

By taking corporate marketing concepts and applying it to countries, "nation branding" is a way for these regions to enhance their reputations and pro-

ject a desired image for international recognition. New modes of publicity and marketing geared towards geographic location fall into this category, leading nation branding to have vast benefits for the economics and societies of countries. New marketing strategies have emerged and are being adopted to consequently brand countries with this purpose of economic growth. By studying these emerging strategies and methods, nations can best develop a desired brand and reputation to foster growth and prosperity. The Handbook of Research on Future Policies and Strategies for Nation Branding discusses how exactly nation branding works to benefit the function and mission of these nations along with showing how nation branding can be used as a strategic asset for the redesign of economic, political, and social characteristics of a country. The chapters outline the given situation of nations and the nature and implications of the brand that is required, measure branding inference, and propose future steps for nation branding. This book is a critical reference source for brand managers, tourism professionals, marketers, advertis-

ers, government officials, travel agencies, academicians, researchers, and students working in the fields of international relations, economics, social sciences, business studies, marketing, and entrepreneurship.

This first volume of two on European Monetary Union (EMU) is based on the work, and gives the view, of the Commission of the European Communities. It provides a general introduction to the issues. The EMU project is outlined and its benefits and costs examined, including the implications for public finances and the impact on the international system. The author also looks at transitional issues in general, at national per-

spectives, transaction costs, and macroeconomic modelsimulations.

This book was originally intended to be (a 3 Volume set or Trilogy, but has been shortened to a single volume and edited for publication as a single title), *Not afraid To Tell The Truth* which could be subtitled: *Exposing the conspiracy of silence in the Last Days*, it is not a book about discipleship necessarily, nor is it a book you could use as a guideline for counseling; rather it is a book written with the intention of shedding light upon (13) contrasting themes running through the whole of Gods Word, which the author believes have become confused by Western Christian wrong thinking,

preaching and practice in the last days of the Church age\*. False teachers and heretical teachings have crept into the Church unawares bringing with it a form of captivity similar to the captivity of the nation Israel, but with far graver consequences.
