In economics, the Laffer curve, popularized by supply-side economist Arthur Laffer, illustrates a theoretical relationship between rates of taxation and the resulting levels of the government's tax revenue. The Laffer curve assumes that no tax revenue is raised at the extreme tax rates of 0% and 100%, and that there is a tax rate between 0% and 100% that maximizes government tax revenue.

Managerial Economics - Fundamental and Advanced Concepts

The duo presented macro-economic theories linking major increases in personal debt with major recessions — then backed those theories up with hard data. “We have a number of different explanations for what might be causing those booms and busts,” Mian told Equitable Growth in 2018, “what might be causing some countries to grow more aggressively than others.
