The great thing about electrical engineering is that it is deeply involved in high science, particularly physics. You make things — or make them better. Things like solid-state circuits, microwave electronics, quantum and optical electronics, large-scale networks and systems, or computer-aided design — and those are just a few possibilities.

Faculty conduct research that spans our five disciplines of civil, electrical and mechanical engineering, bioengineering, and computer science and engineering. The college collaborates with industry from around the state; our laboratories and research opportunities give students the hands-on experience they need to excel in the professional world.
