It will not waste your time. acknowledge me, the e-book will very announce you other issue to read. Just invest little become old to open this on-line pronouncement **Emerging Trends In Healthcare India In Business** as with ease as review them wherever you are now.

K4CRJL - OCONNELL HINTON

AI and healthcare technology in India: opportunities ... Paper-based systems and lack of real-time reporting make collaboration among healthcare disciplines and institutions difficult. At the same time, health dominates the top 10 emerging technologies. This means that healthcare is both catching up to and driving emerging technologies. The potential for growth is enormous.

Due to this pandemic and subsequent lockdown, the healthcare industry is witnessing different emerging trends across the globe relating to health maintenance. People are relying more and more on teleconsultations and telemedicine instead of traditional options. Amid all this, Rajat Garg, Co-Founder & CEO, myUpchar sheds more light on how healthcare industry is witnessing different emerging trends in view of the Covid-19 pandemic. Digital health is an innovative, ever-changing area in healthcare. With the potential to ease the demand on overstretched healthcare systems across the world, while simultaneously offering patients the opportunity to control their own disease management, digital health offers an opportunity to improve healthcare for patients while helping doctors to be more efficient.
