### 6A9NKB - JAMARCUS NEAL

When the planet Empyrea, a colony of genetically perfected human beings, demands that the Federation remove a science station which has been in place for nearly twenty years, the Starship Enterprise™ is assigned to transport to the planet the Federation ambassador who negotiated with the Empyreans long ago -- an ambassador who was once Dr. McCoy's closest friend, but is now a bitter rival. On Empyrea, McCoy discovers Anna, a daughter he never knew he had. McCoy soon realizes that the isolationist Empyreans must not learn her father is an off-worlder, and that her genes are less than "perfect." As relations with the Empyreans collapse around him, McCoy must find a way to save his new-found daughter from the harshest penalty her planet can impose! Aurelia, the first princess born in Renalt in 200 years, is destined to marry the mysterious prince of Achelva, Valentin, but her treacherous lady-in-waiting, Lisette, plots to take her crown.

In this the third of the Guy Edrich trilogy Guy painstakingly develops an economic model in the area he calls home, to be replicated across the world eventually. His initial aim is to undermine the cabal put in place by Autarkhos, to rule over the United Kingdom. In time Guy's scheme will replace cabals and dictators that Autarkhos empowered throughout the world. During that complex process, the people of earth gradually become aware of a fresh set of aliens rapidly multiplying in this realm. On first sight these seem very different from all others. Some believe them, in their beauty, to be angels that will protect mankind from any other demons that might invade this world. Meanwhile, Guy's psychic talents develop further still, as other half-breeds in this realm also find their minds expanding. They do not always take on the values of the Credentes. Some choose to be enemies to Guy Edrich. Pilles Tochter in Gefahr! Auf dem Planeten Empyrea existiert eine Kolonie genetisch perfektionierter Menschen, die mit ihren "minderwertigen" Verwandten nichts mehr zu tun haben wollen. Sie treten aus der Föderation aus. Botschafter Mark Rousseau und die Enterprise-Crew sollen die Empyreaner umstimmen. Pille erlebt auf dem Planet noch eine ganz andere Überraschung: Er ist Vater einer beinahe erwachsenen Tochter. Doch die Gesetze auf Empyrea erlauben keine "schlechten" Gene - McCoys Tochter droht die Verbannung oder gar Exekution.

When tragedy upends his safe, boring life tucked into an obscure hamlet in the wilds of Empyrea, Kaden learns of his destiny as the king of Empyrea. Called to act by a powerful wizard, the fledgling king must traverse unfamiliar lands and tame his untapped power to fulfill his purpose. He must unite the scattered tribes and find the ancient armor and sword, artifacts blessed by Orealus that his father once wielded. Kaden's quest to fulfill his destiny takes him through the most dangerous places in the land, confronting vile creatures beyond even those his worst nightmares could conjure.

Marauding hoards, wielded by Lucient, a powerful dark spirit that possesses a strong hatred for everything of light and good, want nothing more than to destroy Kaden. To keep himself alive, Kaden must earn trust from unexpected allies, a motley crew comprised of a zany goblin, a distrusting elf, and a motherly fairy. What could go wrong? Will his cunning wit, determination, and masterful sword-fighting skills - well, they'll be masterful eventually - be enough to crown him the leader of Empyrea and defeat the evil lying in wait ahead?

The Zygaenidae are a family of day-flying moths with an unusual biology - they are capable of releasing prussic (hydrocyanic) acid. All Australian species belong to the subfamily Procrinae (commonly known as foresters) and many of these feature iridescent green colours or a wasp-like look. This is the first study of the Australian fauna of these attractive and biologically interesting moths. In this volume their beauty is captured larger-than-life in 114 finely detailed portraits by acclaimed artist František Gregor, setting a new benchmark for moth illustrations. Comprehensive general chapters discuss zygaenid morphology, biology, phylogeny and classification, with considerable new information of worldwide relevance. The book then provides in-depth treatments of

the 10 genera and 43 species present in Australia, including 4 genera and 21 species new to science. It features keys to genera and species, photos of genitalia of both sexes and other diagnostic structures, and distribution maps for all species. Additionally, there are 8 pages of colour photographs and over 400 photos of microscopic structures, including more than a hundred spectacular scanning electron micrographs.
