The overhaul schedule is a projection based on the estimate of when each engine will reach 20,000 operating hours since its last overhaul. 20,000 operating hours accumulates on average in 7.5 years but depends on the usage of the engine.

Hi performance engines can contain three times as many parts and compo-

nents than a simple old 6 banger diesel. Many people think of an overhaul as consisting of replacement of bearings, rings and cylinder liners. But that's only part of the story.
