This book includes the Chapterwise MCQs Question Bank of ICSE English-I, English-II, Physics, Chemistry, Biology, Mathematics, History & Civics, Geography and Hindi Class 10. This book is beneficial for first term.

Relates to science students of Ahmednagar College, University of Poona.

This book presents a longitudinal, quasi-experimental classroom study into the effects of inductive and deductive instruction on the acquisition of pragmatic competence in adult English-as-a-For-eign-Language learners. Set within the explicit teaching paradigm, it presents the first systematic analysis of the contrast between inductive and deductive teaching methods in instructional pragmatics. Two learner groups were taught about disagreement and offer refusal, and their pragmatic skills were...

English medium-of-instruction (EMI) is transforming modern-day universities across the globe, creating increasingly complex linguistic and intercultural realities which lecturers, students and decision-makers must negotiate. Teaching subject matter at higher-education level through the medium of English, in countries where English is neither an official nor national language (e.g. the Netherlands, Germany), is a highly complex phenomenon fraught with challenges and benefits. EMI programmes are capable of transforming domestic degree programmes into platforms of intercultural teaching and learning by infusing them with greater numbers of international faculty and students. Equally however, EMI programmes pose a socio-linguistic, -cultural and -economic challenge by institutionalising English at higher-education level within a country and displacing somewhat national and minority languages. This book, the first of its kind, provides an up-to-date and empirically-informed exploration of these salient themes in Europe, based on significant empirical data gathered and analysed on the German EMI context.

This book comprises select proceedings of the 4th International Conference on Innovative Computing (IC 2021) focusing on cutting-edge research carried out in the areas of information technology, science, and engineering. Some of the themes covered in this book are cloud communications and networking, high performance computing, architecture for secure and interactive IoT, satellite communication, wearable network and system, infrastructure management, etc. The essays are written by leading international experts, making it a valuable resource for researchers and practicing engineers alike.

This volume is a collection of scholarly papers that explore the complex issues concerning English Studies in the present Indian context. The discussions in this volume range from historical perspectives to classroom-specific pedagogies, from sociological and political hierarchies to the dynamics of intellectual development in the English language environment. Interrogating both policy and practice pertaining to English Studies in the context of Indian society, culture, history, literature and governance, the chapters seek to formulate contemporary perspectives to these debates and envision alternative possibilities. Since the introduction of English to India more than 2 centuries ago, the language has transmuted the very fabric of Indian society, culture, history, literature

and governance. The idea of India cannot be conceived in its entirety without taking into consideration the epistemological role that English has played in its formation. The present globalized world order has added dimensions to English Studies which are radically different from those of India's colonial and postcolonial past. It is therefore imperative that the multitudinous shades and shadows of the discipline be re-examined with inputs drawn from the present context. This volume is for scholars and researchers of English literature and language studies, linguistics, and culture studies, and others interested in exploring new paradigms of engagement with the disciplinary formulation of English Studies in India.

The book, with comprehensive and practicable coverage, acquaints its readers with thorough knowledge and skills to help the growing children in their proper growth and development enabling them to reach the limit of their excellence on one hand, and instilling in them the sense of responsibility towards their society and nation on the other hand. It dwells on the essential topics such as nature of the process of growth and development going on at the various ages and developmental stages of children, their developmental needs and characteristics, individual differences and diversities existing among them, development of various abilities and capacities like intelligence, creativity, and overall personality characteristics, nature of the age-linked behavioural problems, adjustment and mental health, parenting styles, and methods of dealing with the behavioural problems, adjustment, and stressful conditions of the developing children. The text equips the readers with all what is in demand for helping the developing children at this juncture of rapid industrialisation, globalisation, urbanisation, modernisation and economic change. It is primarily designed for the undergraduate students of education and elementary education. KEY FEATURES • Incorporates quite advanced topics such as emotional intelligence, use of reflective journals, anecdotal records and narratives as method of understanding child's behaviour, and so on • Includes detailed discussion of theories of child development, theories of learning, theories of intelligence, theories of achievement motivation, theories of creativity, and theories of personality • Offers engaging language and user-friendly mode of discussion • Adequately illustrated with examples, figures and tables • Comprises chapter-end summary for quick glance of the concepts.

"As we hoped, Hintze's further development made him one of the great ones in the discipline. To be sure, he was one of those who was only known in the circle of experts, like a very high mountain in a mountain range which one first noticed from the vantage point of a high pass." --Friedrich Meinecke, 1941 (translated by Leonard S. Smith) "What we call historicism is a new, unique, categorical-structure of the mind [des Geistes] that began to arise in the West in the eighteenth century and achieved authoritative currency in the nineteenth, particularly in Germany, though not in Germany alone. It is characterized by the categories of individuality and development, which postulate a view of historical reality based on the analogy of the life unit [Lebenseinheit] and the life-process [Lebensprozess]." --Otto Hintze, 1927 (translated by Leonard S. Smith) "If Hintze could be included, as he should be, as

one of 'the great ones in the discipline' in historiography classes throughout the United States, this could greatly widen 'the circle of experts' in this and other English-speaking countries and/or encourage history teachers to lead students to reach 'the vantage point of a high pass' where they could see this 'very high mountain' for themselves." --Leonard S. Smith, 2012

English Language Through Literature is specifically composed keeping in mind the needs of the first and second semester students of English Core who have scored 80 percent and above in English in Class XII. This student-centric book has been designed to offer complete clarity on concepts and topics which are part of the syllabus. The aim is to sharpen the reading, writing, speaking, listening, grammar and vocabulary-building skills through various activities and exercises, thereby building confidence of mastering the language. With minimal textual emphasis and optimal use of practical exercises, an effort has been made to make learning a pleasure for students. In student-friendly language, the book caters to young readers looking for innovative and interactive material in English.

This book focuses on the assessment of English language writing in China mainland, the territories of Hong Kong and Macau, and Taiwan. The first part of the book describes how writing in English has been assessed in Chinese contexts in the past 25 years, and how it continues to be assessed at present. The second part of the book presents reports of work such as formative classroom-based assessment, feedback-based or feedback-led approaches, learning-oriented assessment, portfolios, as well as the important issue of teacher professional development in writing assessment. This two-part division relates to and reflects what has been happening in writing assessment internationally, in the UK from the 1940s, and in the US in the past 25 years. The use of English for international business communication, for international political negotiations and its rapidly increasing use as a medium of instruction in some subject areas has led to a rapid increase in the numbers of Chinese L1 speakers who are learning and being assessed in English. This is often done with an emphasis on reading and writing. The vast majority of assessments of English language writing are done through large-scale direct testing that uses simple prompts/tasks and short writing samples. This book explores best practices in assessing the writing in English of native speakers of Chinese. Assessing the English Language Writing of Chinese Learners of English edited by long-time experts Liz Hamp-Lyons and Yan Jin clearly demonstrates the authors' collective years of writing and teaching about writing assessment. The book's 13 chapters, written by recognized experts in assessment of Chinese speakers learning English, represent a wide array of important topics written in reader friendly language and offering evidence for pedagogical practices as well as high-stakes testing of writing. Teachers, researchers, administrators of writing programs in China, and test developers who seek counsel about this population need look no further than to add Assessing the English Language Writing of Chinese Learners of English to their reading list. Collaborative approaches to special education that seek to provide innovative, creative, and novel ways to disrupt current structures and practices are necessary to move the field towards a more inclusive model for educating students with disabilities. Multiple professionals are involved in interdisciplinary and multidisciplinary teams to develop and implement individualized education programs (IEPs) for students with disabilities, extending the pool of stakeholders in special education far beyond the special education teacher. Achieving a strong understanding between the multiple professions involved in IEP development and implementation will improve data-based individualization, the fidelity of program implementation, and the sustainability of practices and services. The Handbook of Research on Interdisciplinary Preparation for Equitable Special Education explores and highlights interdisciplinary personnel preparation to advance special education and enhance outcomes for students with disabilities. This book also provides theories and frameworks, examples, and discussions around innovations and lessons learned from interdisciplinary preparation programs and practices. Covering key topics such as educator preparation models, equity, diverse students, and educator competencies, this premier reference source is ideal for administrators, principals, researchers, academicians, practitioners, scholars, instructors, and students.
