Trust **SOUTH-WESTERN FEDERAL TAXATION 2018: ESSENTIALS OF TAXATION: INDIVIDUALS AND BUSINESS ENTITIES, 21E** for the most effective tax coverage available today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This edited collection addresses the major issues encountered in the calculation of economic damages to individuals in civil

litigation. In federal and state courts in the United States, as well as in other nations, when one party sues another, the suing party is required not only to prove that the harm was, indeed, caused by the other party, but also to claim and demonstrate that a specified dollar value represents just compensation for the harm. Forensic economists are often called upon to evaluate, measure, and opine on the degree of economic loss that is alleged to have occurred. Aimed at both practitioners and theorists, the original articles and essays in the edited collection are written by nationally recognized and widely published forensic experts. Its strength is in showcas-

ing theories, methods, and measurements as they differ in a variety of cases, and in its review of the forensic economics literature developed over the past thirty years. Readers will find informative discussions of topics such as establishing earnings capacity for both adults and infants, worklife probability, personal consumption deductions, taxation as treated in federal and state courts, valuing fringe benefits, discounting theory and practice, the effects of the Affordable Care Act, the valuation of personal services, wrongful discharge, hedonics, effective communication by the expert witness, and ethical issues. The volume also covers surveys of the views of practicing forensic economists, the connection between law and forensic economics, alternatives to litigation in the form of VCF-like schedules, and key differences among nations in measuring economic damages.

Analysis of notion, roots and measures of treaty abuse The OECD initiative on Base Erosion and Profit Shifting has put the issue of treaty abuse and the means to counter it on top of the global political agenda. Preventing treaty abuse is therefore currently one of the most debated topics in international tax law. Diverging national legal traditions in combatting abuse both under domestic and tax treaty law have led to a globally diversified legal framework in this respect and make the OECD's agenda to harmonize these attempts even more challenging. The aim of this book is to analyze the notion of treaty abuse, its histori-

cal roots and the measures to counter it. The book's topics cover a wide range of both policy and legal issues. The contributions' main focus lies on analyzing the proposals put forward by the OECD in BEPS action items 6 and 7. In addition, this book analyzes the lessons which can be learnt from the US tax treaty policy and elaborates on the effects the intensified fight against treaty abuse will have from a Non-OECD member state perspective. Also EU law is taken into account and the question raised which impact the fundamental freedoms might have on the development of new anti-avoidance rules. Finally the relation between domestic and treaty based anti-avoidance is analyzed in great detail, identifying the methodical problems of ensuring a sound and abuse safe legal framework. With this book, the authors and editors hope to contribute to the discussion on selected issues of preventing treaty abuse and the challenges they present to policy makers, judges, tax administrations and tax advisers.

"I've totally washed away the dream of having one more child." "I had never intended to be a stay-at-home-parent, but the cost of child care turned me into one." "We had to pull our toddler out of his program because we couldn't afford to have two kids in high-quality care." These are not the voices of those down on their luck, but the voices of America's middle class. The lack of affordable, available, high-quality childcare is a boulder on the backs of all but the most affluent. Millions of hard-working families are left gasping for air while the next generation misses out on a strong start. To date, we've been fighting this five-alarm fire with the policy equivalent of beach toy water buckets. It's time for a bold investment in America's families and America's future. There's only one viable

solution: Childcare should be free.

Recent developments in direct taxes and VAT/GST Taxes - in general - have be-

come the topic of broad legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The contributions in this book make a legal comparison of the recent develop-

ments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.
