FO1MGO - ANGEL MORENO

An 1888 primer on the Japanese language by a British professor of Japanese at the Imperial University, Tokyo.

"I'm sitting here in Newfoundland, in Canada, writing a book about sociolinguistics, and you're out there somewhere, starting to read it. If you were here and could hear me talk -- especially if you were Canadian, especially if you had some training -- you could tell a lot about me. When I speak English, most people can tell I'm North American (I pronounce schedule with a [sk] sound), Canadian (I rhyme shone with gone, not bone), and probably from Quebec (I keep my socks in a bureau). And if I was wherever you are, I could probably tell a lot about your speech community and where you fit into it. The fact that we can do this is one of the things that interest sociolinguists..." It's rare to encounter a textbook that one will want to read cover to cover. But Gerard van Herk has written exactly that, introducing students to the field of sociolinguistics as the best teachers do: with excitement, humor, and deep knowledge. What is Sociolinguistics? is a tour through the major issues that define the field, such as region, status, gender, time, language attitudes, interaction, and style, while also exploring the sociolinguistics of multilingualism, culture and ethnicity, language contact, and education. The chapters contain useful and clear features including: Numerous innovative exercises and Spotlit research, where the author introduces some key concepts discussed in foundational research and offers suggestions for reading the primary literature Further readings, glossary terms, chapter summaries, and text boxes that explore introduced concepts in greater depth for interested students The companion website offers PowerPoint slides for instructors and sample answers to questions, while providing students with further resources, including sound files and carefully curated links for further study.
