The relationship of work-places in terms of departments is also planned at this stage. This stage also deals with plant location and layout. 2) PROCESS PLANNING

Factory Planning Manual PDF Michael Schenk, Siegfried ...

Factory Planning: Support for the Factory of the Future Adding value with Industry 4.0 is an issue that involves optimizing many areas, such as logistics and production. However, the decisive factor is a modern factory where all of these areas come together efficiently.

Regularly the factory planning occurs after the principle top down, spoken from the implementation from the master plan to the smallest, unique details. The main objective of this plan is to implement the manufacturing and assembly, where, for example, storage, transportation, flow of material and supply, research and energy use take an even higher significance.

Factory Planning & Scheduling Reviews and Pricing - 2020

Abstract. Examines the factors to be considered when developing a functional layout for new factories or offices. Considers the importance of gaining information from work studies, and developing an ideal layout before construction starts if the building is new. Concludes that factors such as travel times, facilities, communications, and location of equipment, and the opinions of employees are all worthy of consideration.
