'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data

center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task. We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2 and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family.

Originally published in 1960, *The Constitution of Liberty* delineates and defends the principles of a free society and traces the origin, rise, and decline of the rule of law. Casting a skeptical eye on the growth of the welfare state, Hayek examines the challenges to freedom posed by an ever expanding government as well as its corrosive effect on the creation, preservation, and utilization of knowledge. In distinction to those who confidently call for the state to play a greater role in society, Hayek puts forward a nuanced argument for prudence. Guided by this quality, he elegantly demonstrates that a free market system in a democratic polity—under the rule of law and with strong constitutional protections of individual rights—represents the best chance for the continuing existence of liberty. Striking a balance between skepticism and hope, Hayek's profound insights remain strikingly vital half a

century on. This definitive edition of *The Constitution of Liberty* will give a new generation the opportunity to learn from Hayek's enduring wisdom.

In this unique book first published in 1916, Romanian Jew ALEXANDER AARONSOHN documents for the world the struggle that went on in Palestine during the early years of the Zionist movement, when his parents helped found the village of Zicron-Jacob and worked to transform the desert into a fertile garden. Aaronsohn tells the story of his life, from his early trip to America to being pressed into military service for Turkey. His personal account covers the imposition of Germany into Turkish politics and the effect of German propaganda on Turkish attitudes towards outsiders, including himself. In the events that follow, Aaronsohn struggles to save his home and his family from growing oppression of the Turks.
