Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter.

Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. Libby/Libby/Hodge wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Hodge successfully implements a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby/Libby/Hodge believes in the building-block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

Primarily intended for the first course in financial accounting for the postgraduate students of management, this systematically organized text discusses the essential concepts, principles and methods of

financial accounting. It covers all important financial concepts and corporate financial reporting practices. The book, in its Fifth Edition, includes Revised Schedule III to the Companies Act, 2013, which provides Balance Sheet and Profit and Loss Account Format. Besides, more illustrations have been provided for easy grasping of the concept. The Schedule VI has also been explained at the appropriate places. While the emphasis throughout is given on the fundamentals, the book also skilfully analyzes advanced topics such as financial instruments, earnings management, internal control and internal audit, business combination and the logit model.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of **Financial Accounting: IFRS** highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign curren-

cy examples instead of solely U.S. dollars. Now celebrating more than 50 years in publication, Frank Wood's Business Accounting Volume 2 continues to provide an essential guide for accounting students around the world. With the 14th edition now repositioned to take a deeper focus on financial accounting, analysis and reporting, this book builds upon the fundamentals of financial accounting to provide you with all the necessary tools you need to help pass your accounting exams. New to this edition:

- Focus on financial accounting, analysis and reporting to provide further depth
- 'Maths for Accounting' Chapter
- 'Earnings Management' Chapter
