The objective of this textbook is to teach students to be conversational in speaking "numbers." This means understanding fundamental accounting concepts, developing solid financial analysis abilities, and then applying them to understand and improve the operational performance of their hotel or restaurant. The book will accomplish this by studying the current practices of some of today's leading hotel and restaurant companies. Chapters will be developed under the auspices of a select group of hospitality industry General Managers, Directors of Finance, and Regional Accounting Managers to ensure that the information is current, accurate and useful. Understanding and applying the information will be the main focus of this book. This textbook should provide hospitality managers the knowledge and experience to be comfortable in using numbers to operate their departments. This includes developing the ability to perform all accounting and financial aspects of their position efficiently and correctly including revenue forecasting, wage scheduling, budgeting, P&L critiques, purchasing procedures and cost control methods. As a result, they will have more time to spend on the floor with their customers and employees. This knowledge will help them understand their operations and how to improve, change or expand them to increase revenues or profits.

Author of cult classics The Pumpkin Plan and The Toilet Paper Entrepreneur offers a simple, counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting uses the logical (albeit, flawed) formula: Sales - Expenses = Profit. The problem is, businesses are run by humans, and hu-

mans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula: Sales - Profit = Expenses. Just as the most effective weight loss strategy is to limit portions by using smaller plates, Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that:

- Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances.
- A small, profitable business can be worth much more than a large business surviving on its top line.
- Businesses that attain early and sustained profitability have a better shot at achieving long-term growth.

With dozens of case studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any entrepreneur to make money they always dreamed of.

This text in a hundred pages explains how to make a bookkeeping and financial reporting system in Google Sheets or Microsoft Excel. It is the simpler, faster, and better 2.nd edition of a tried-and-tested double-entry system, whose 1.st edition was already smart, dependable, and easy to use. The text pragmatically and directly links accounting, ICT, and business management. It covers profit & loss, balance sheet, cash flow, explanatory notes & specifications, journal & ledger, rolling & fixed budget, group consolidation and KPI monitoring, system audit, error checking, data validation, and troubleshooting. The system features automated sales tax/VAT with multiple rates and withheld tax, IFRS/GAAP compliant currency accounting with daily spot rate lookup, multiple reporting entities with multiple banks and types of bills, and unique hard-to-get facilities like dynamic single-entry sub-accounting, spreadsheet formula integration, and reporting in other languages. The author is a senior businessperson with an MBA degree from Henley Business School, who owns and manages a portfolio of firms. The design is free from programming (VBA, scripts, macros...) and hard limit usage tiers (number of businesses, reports, accounts, records, currencies...).
