The updated, real-world guide to interpreting and unpacking GAAP and non-GAAP financial statements In Financial Statement Analysis, 5th Edition, leading investment authority Martin Fridson returns with Fernando Alvarez to provide the analytical framework you need to scrutinize financial statements, whether you're evaluating a company's stock price or determining valuations for a merger or acquisition. Rather than taking financial statements at face value, you'll learn practical and straightforward analytical techniques for uncovering the reality behind the numbers. This fully revised and up-to-date 5th Edition offers fresh information that will help you to evaluate financial statements in today's volatile markets and uncertain economy. The declining connection between GAAP earnings and stock prices has introduced a need to discriminate between instructive and misleading non-GAAP alternatives. This book integrates the alternatives and provides guidance on understand-

ing the extent to which non-GAAP reports, particularly from US companies, may be biased. Understanding financial statements is an essential skill for business professionals and investors. Most books on the subject proceed from the questionable premise that companies' objective is to present a true picture of their financial condition. A safer assumption is that they seek to minimize the cost of raising capital by portraying themselves in the most favorable light possible. Financial Statement Analysis teaches readers the tricks that companies use to mislead, so readers can more clearly interpret statements. Learn how to read and understand financial statements prepared according to GAAP and non-GAAP standards Compare CFROI, EVA, Valens, and other non-GAAP methodologies to determine how accurate companies' reports are Improve your business decision making, stock valuations, or merger and acquisition strategy Develop the essential skill of quickly and accurately gathering and assessing information from financial statements of all types Professional analysts, investors, and students will gain valuable knowledge from this updated edition of the popular guide. Filled with real-life examples and expert advice, Financial Statement Analysis, 5th Edition, will help you interpret and unpack financial statements.

Mergers and acquisitions (M&As) reshape the corporate landscape helping companies expand market share and gain a strategic advantage. The ability to understand and analyze these transactions is a crucial skill. The first step in acquiring that skill is being able to gather and analyse information on M&As from public sources, such as financial statements. This textbook helps its readers better analyze M&A transactions using information provided in financial statements. Covering accounting and reporting of consolidations, goodwill, non-controlling interests, step acquisitions, spin-offs, equity carve-outs, joint ventures, leveraged buyouts, disposal of subsidiaries, special purpose entities, and taxes, it focuses on the link between underlying economic events and the information in financial statements and how this link affects the assessment of corporate performance. The first part of the book provides description of the accounting rules governing M&A transactions, while the second part includes cases of M&A transactions. Each case focuses on a different element of an M&A transaction, and it is followed by a detailed solution with a complete analysis. Unlike other books in this field, this textbook focuses exclusively on accounting and financial analysis for graduate and upper undergraduate level courses in financial analysis, corporate finance, and financial accounting.

Commercial Management: theory and practice defines the role of commercial management within project-oriented organisations, providing a framework for and helping to develop a critical understanding of the factors that influence commercial management practice. It also identifies generic aspects of this practice and provides a theoretical foundation to these activities, by reference to existing and emergent theories and concepts, as well as to relevant management best practice. The book is structured into four parts: Part 1 Introduction – Commercial Management in Project Environments explores the nature of commercial practice within project-oriented organisations at the buyer-seller interface. It presents a Commercial Management framework, which illustrates the multiple interactions and connections between the purchaser's procurement cycle and a supplier's bidding and implementation cycles. Additionally, it outlines the principle activities undertaken by the commercial function, identifies the skills and abilities that support these activities and reviews the theories and concepts that underpin commercial practice. Finally, it identifies areas of commonality of practice with other functions found within project-oriented organisations, plus sources of potential conflict and misunderstanding. Part 2 – Elements of Commercial Theory and Practice covers commercial leadership; exploring strategy; risk and uncertainty management; financial decision-making; and key legal issues. Part 3 – Approaches to Commercial Practice addresses best practice management; and commercial and contracting strategies and tactics. Finally, Part 4 – Case Studies offers two extended case studies: Football Stadia (the Millennium Stadium, Cardiff; the Emirates Stadium, Islington; and Wembley Stadium, London); and Heathrow Terminal 5. The book provides a one-stop-shop to the many topics that underpin commercial management practice from both a demand (buy-side) and a supply (sell-side) perspective. It will help develop an understanding of the issues influencing commercial management: leadership, strategy, risk, financial, legal, best practice management and commercial and contracting strategy and tactics. In *Compensation and Benefit Design*, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In *Investing in People*, Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.
