A new understanding of ADD, along with practical information on how to recognize and treat the disorder A leading expert in the assessment and treatment of Attention Deficit Disorder/Attention Deficit/Hyperactivity Disorder dispels myths and offers reassuring, practical information about treatments. Drawing on recent findings in neuroscience and a rich variety of case studies from his own clinical practice, Dr. Thomas E. Brown describes what ADD syndrome is, how it can be recognized at different ages, and how it can best be treated. This is the first book to address the perplexing question about ADD: how can individuals, some very bright, be chronically unable to "pay attention," yet be able to focus very well on specific tasks that strongly interest them? Dr. Brown disputes the "willpower" explanation and explains how inherited malfunctions of the brain's management system prevent some people from being able to deal adequately with challenging tasks of childhood, adolescence, and adulthood. His book is an authoritative and practical guide for physicians and psychologists, parents and teachers, and the 7 to 9 percent of persons who suffer from ADD/ADHD.

This comprehensive resource and clinical guide for students and practicing pediatric therapists features current information on the neurological foundations of hand skills, the development of hand skills, and intervention with children who have problems related to hand skills. Covers foundation

and development of hand skills, therapeutic intervention, and special problems and approaches. Is readable, concise, and well-organized with a consistent format throughout. Integrates recent research findings and current thinking throughout the text. Emphasizes neuroscience and the hand's sensory function and haptic perception. Applies neuroscience and development frames of reference throughout. Implications for practice included in each chapter. Presents concepts in the foundation/development chapters that are linked with the intervention chapters. Seven new chapters reflect current practice in the field and cover cognition & motor skills, handedness, fine-motor program for preschoolers, handwriting evaluation, splinting the upper extremity of the child, pediatric hand therapy, and efficacy of interventions. Extensively revised content throughout includes new research and theories, new techniques, current trends, and new information sources. 9 new contributors offer authoritative guidance in the field. Over 200 new illustrations demonstrate important concepts with new clinical photographs and line drawings. Over 50 new tables and boxes highlight important information. An updated and expanded glossary defines key terms.

Tangle Art and Drawing Games for Kids is perfect for families who want to sneak a little more creativity into their lives and have fun doing it. It's about exploring, experimenting, and getting lost in creativity. It's not focused on goals, but on enjoying the process. Professional artist Jeanette Nyberg brings to life 46 drawing games that offer playful, easy ways to get a pen moving across a page, help keep the mind focused, and provide hours of edifying entertainment. Move through the book at your own pace. Start with basic drawing games, followed by a section of activities that can be done with friends, then work with some mixed-media activities, and end with awesome tangle art games. Each activity includes ideas for how to "Make it Silly," and ways to vary the themes so you can play the games over and over. Families will make exciting discoveries, find creative ways to spend their time, master visual and manual skills, and most importantly, have fun!

The updated and expanded 2nd edition of FINE MOTOR SKILLS IN CHILDREN WITH DOWN SYNDROME continues to be a popular, practical guide to understanding fine motor skills in children with Down syndrome and helping them develop these skills from birth through early adolescence. The first edition won a Parent's Choice Award in 1999. The author, an occupational therapist who has worked extensively with children with Down syndrome, is also the parent of a teenager with Down syndrome. She offers parents and professionals dozens of easy, home- and school-based activities, illustrated with black and white photos, which help children gradually acquire the skills they need for fine motor development. Readers learn how to incorporate work on fine motor skills into everyday activities and routines and to emphasize tasks that children can use throughout life -- play, self-help, printing, cutting with scissors, and computer use. New to this edition is a chapter on sensory processing and how the sensory system affects behaviour and learning in children with Down syndrome. Parents learn strategies that can help children handle various sensory problems so they can continue to learn daily living skills. Bruni includes new information on determining when a child is ready for 'pre-printing' activities (things a child can do to prepare for trying to print letters) and how to introduce related concepts (up & down; top & bottom; start & stop; left & right). The 2nd edition also includes more information on ways to help children learn self-help skills, such as dressing, using a fork and spoon, and becoming potty trained. This new and improved edition gives parents and professionals the expertise and confidence they need to help children build fine motor abilities and become more independent. Target Audience: Parents of children with Down syndrome, early intervention specialists, occupational and physical therapists, teachers

This radically different and effective approach to handwriting gently guides both regular and special education students through the necessary stages of perceptual and fine-motor development towards legibility. Book 2 begins by expanding the activities offered in Book 1 including connecting dots, circling a shape inside and out, words searches, figure-ground discrimination, and tracing routes (mazes). Then Book 2 moves on to coloring, copying patterns and diagrams, letter searches, and connecting reference points in a grid to make capital letters. Write from the Start lays a firm foundation for accurate handwriting

The Targeting Handwriting series is the only handwriting program that supports teachers with a resource book for each year in Lower Primary - Prep, Year 1 and Year 2. Bulk pricing available. Contact Stacie at www.skillbuilderbooks.com for more information. "I recommend Fine Motor ABC for all of my students. It's a valuable tool for kids with typical development and for those with delayed motor skills." Melissa Whitten, Preschool Teacher Build skills one page at a time with Fine Motor ABC; 26 targeted activities designed for children ages 4 to 7. This alphabet themed book is an engaging and easy-to-implement resource that helps kids of all abilities develop foundational and functional fine motor skills. Each activity in the book is accompanied by a photograph showing how to perform the task, corresponding alphabet hand sign, and two sections of text. The main text is a rhyming couplet written in children's book style. It is a quick, fun, and engaging description of the activity. This gets kids interested and gives simple vocabulary to use when completing or discussing each task. The bottom text is designed to give teachers, parents, and caregivers more information about what the activity is addressing and its importance. This empowers adults with the knowledge of not only what to do to help kids develop skills, but how to do it, and why. Whether you simply read through the book, do all 26 activities in a row, or something in between, know that each time a child interacts with Fine Motor ABC they are building skills for success. 120 copiable sheets take children through all stages of handwriting and provide a huge bank of practice material Covers prewriting activities, individual letter forms, joining, developing fluent writing In line with the development of an easy cursive style

This radically different and effective approach to handwriting gently guides both regular and special education students through the necessary stages of perceptual and fine-motor development towards legibility. Book 1 is based on holistic Gestalt principles of learning, the tasks include connecting dots, circling a shape inside and outside, word searches, figure-ground discrimination, and tracing routes (mazes). The introduction includes thorough background pedagogy, a glossary, bibliography, and suggestions for further reading. Write from the Start lays a firm foundation for accurate handwriting

The objectives of Book 1 are to establish good basic habits of paper positioning and pencil hold, and to develop the fine motor skills needed for accurate, consistent writing. It presents techniques and practice for left-handers, along with guidelines for parents and teachers.

Use dozens of easy, practical activities to help children develop shoulder, wrist, hand, and finger coordination. As they gain control, they'll be preparing for success in cutting, drawing, and writing.

In The Ultimate Guide to Mark Making in the Early Years, internationally renowned teacher trainer Sue Cowley takes practitioners on a journey: the journey young children embark upon when they learn their first words and make their first marks. Filled with practical activities and honest advice, this must-have guide presents a wide range of creative approaches to developing mark making and building language skills in the Early Years. With ideas to build finger strength and eye-to-hand coordination, activities for understanding the concept of symbols and signs and strategies for building confidence in reading and writing including talk and drama, you'll find a variety of techniques to develop children's key skills and motivation. Sue also includes full-colour photographs and examples of early marks to illustrate how young children's communication skills develop. There are tips for getting boys engaged in writing and a companion website with downloadable resources and useful links. The Ultimate Guide to Mark Making in the Early Years is an invaluable source of inspiration for all those working with children aged three to seven.
