The X-Plane 11 Flight Management System The Laminar Research / X-Plane 11 FMS resembles a system built by Collins and found in regional airliners, and is similar in operation to the one used in Boeing aircraft, including the 737 (illustrated in this manual). Rival systems are built by Honeywell and Thales for use in Boeing and Airbus aircraft.

X-Plane 11

The challenge is to keep flight crews current and familiar with the highly sophisticated system to allow them to take full advantage

of it without increasing pilot workload. An effective solution is the Avionics FMS desktop trainer from Rockwell Collins. It uses the same software that is used in the aircraft FMS and display systems.
