Whenever I begin to think about specific experiments that I might do, I am confronted with theoretical problems whose solution

does not require experiments but which can be thought through on the basis of the ordinary experience of everyday life.

Fritz Heider (1896-1988) was an Austrian born American psychologist of the Gestalt school, In 1958 he published The Psychology of Interpersonal Relations, which systematized and expanded upon his creation of balance theory and attribution theory. Heider was born in Vienna, Austria in 1896. His approach to higher education was rather casual, and he wandered freely throughout Europe studying and traveling as he pleased for many years.

Introduction. Fritz Heider (b. 1896–d. 1988) was an Austrian-American Gestalt and social psychologist. He is considered one of the

founding fathers of interpersonal social psychology, contributing in particular his theories of attribution, balance, and motivation. (For attribution theory see the Oxford Bibliographies in Psychology article " Attribution Theory " by Bertram F. Malle and Joanna Korman) Studying in Graz and Berlin, he was influenced both by the Berlin school of Gestalt ...
