Human evolution. Human evolution is the lengthy process of change by which people originated from apelike ancestors. Scientific evidence shows that the physical and behavioral traits shared by all people originated from apelike ancestors and evolved over a period of approximately six million years.

Directed by Nic Young. With Leslie Aiello, Joe Cain, Edward Herrmann, Kevin Hudson. The history of the search for the "missing link" in evolution is told through reenactments and interviews with leading scientists.

The original lineup of Ani-Men (Ape-Man, Bird-Man, Cat-Man and Frog-Man) are recruited by a man named the Organizer. The Organizer is secretly Abner Jonas, a candidate for mayor of New York City, who sends the Ani-Men on missions to undermine the current administration. Daredevil defeats them and the Ani-Men and Organizer all go to prison.

Ape to Man -- The Chasm Furthermore, as the corpus of hominid fossil specimens continues to grow, it has become increasingly evident that there is an unbridgeable chasm between hominids and humans in both composition and culture.

Ape definition is - any of various large tailless semi-erect primates of Africa and southeastern Asia (such as the chimpanzee, gorilla, orangutan, or gibbon) —called also anthropoid, anthropoid ape. How to use ape in a sentence. Synonym Discussion of ape.

As one might imagine, different answers to this question come from different "authorities." Obviously, creationists and evolutionists disagree, but major schools of thought vie among evolutionists. Earlier in this century, it was thought that as apes became humans, they evolved bigger brains. Now, most evolutionists hold the view that brain size is secondary in importance to erect posture.
